*Changing Planes* HMH  
One of the first known  
novels by a Native  
American woman,  
Cogewea (1927) is the  
story of a half-blood  
girl caught between  
the worlds of Anglo

ranchers and full-blood  
reservation Indians;  
between the craven  
and false-hearted  
easterner Alfred  
Densmore and James  
LaGrinder, a half-blood  
cowboy and the best  
rider on the Flathead;  
between book learning  
and the folk wisdom of  
her full-blood  
grandmother. The book

combines authentic Indian lore with the circumstance and dialogue of a popular romance; in its language, it shows a self-taught writer attempting to come to terms with the rift between formal written style and the comfortable rhythms and slang of familiar speech.

In the tradition of *The Orchid Thief*, a compelling narrative set within the strange and genteel world of rare-book collecting: the true story of an infamous book thief, his victims, and the man determined to catch him. Rare-book theft is even more widespread than fine-art theft. Most thieves, of course, steal for profit. John Charles

Gilkey steals purely for the love of books. In an attempt to understand him better, journalist Allison Hoover Bartlett plunged herself into the world of book lust and discovered just how dangerous it can be. John Gilkey is an obsessed, unrepentant book thief who has stolen hundreds of thousands of dollars worth of rare books from book fairs, stores, and libraries around the country. Ken Sanders is the self-appointed "bibliodick" (book dealer with a penchant for detective work) driven to catch him. Bartlett befriended both outlandish characters and found herself caught in the middle of efforts to recover hidden treasure. With a mixture of suspense, insight, and humor, she

has woven this entertaining cat-and-mouse chase into a narrative that not only reveals exactly how Gilkey pulled off his dirtiest crimes, where he stashed the loot, and how Sanders ultimately caught him but also explores the romance of books, the lure to collect them, and the temptation to steal them. Immersing the reader in a rich, wide world of literary obsession, Bartlett looks at the history of book passion, collection, and theft through the ages, to examine the craving that makes some people willing to stop at nothing to possess the books they love. *A Yankee in the Far East* Penguin UK  
A Pulitzer Prize winner interviews workers, from policemen to

piano tuners: “Magnificent . . . To read it is to hear America talking.” —The Boston Globe A National Book Award Finalist and New York Times bestseller Studs Terkel’s classic oral history *Working* is a compelling look at jobs and the people who do them. Consisting of over one hundred interviews with everyone from a gravedigger to a studio head, this book provides a “brilliant” and enduring portrait of people’s feelings about their working lives. This edition includes a new foreword by New York Times journalist Adam Cohen (Forbes). “Splendid . . . Important . . . Rich and fascinating . . . The people we meet are not digits in a poll but

real people with real names who share their anecdotes, adventures, and aspirations with us.” —Business Week “The talk in *Working* is good talk—earthy, passionate, honest, sometimes tender, sometimes crisp, juicy as reality, seasoned with experience.”

Who better to fight back the darkness of the world than the one responsible for most of it? Daylen, once known as the Great Bastard, the Scourge of Nations, Dayless the Conqueror, has lived in hiding since his presumed death. Burdened by age and tremendous guilt, he thinks his life is coming to an end. Unbeknownst to him

he's about to embark on a journey towards redemption where his ruthless abilities might save the world. Many battles await with friends to be made and a past filled with countless crimes to confront, all the while trying to keep his true identity a secret.

Indeed, it might be too much if not for the fabled power awaiting him. Everfall is a world of perpetual day where the continents float in an endless sky. If one jumps from the continent they will fall for many hours before returning to the same place from which they fell. Skyships rule the air powered by shining sunstone and industrial darkstone. A legendary order of knights bears mystical powers which they use to hunt out the dreaded Shade,

monsters that regular people turn into if trapped in darkness for the length of a fall. It is a world of enchanted swords, merciless monsters, mystical knights and hard magic, filled with tales of wonder and adventure.

“A fantastical travel guide, reminiscent of Gulliver’s Travels,” from a narrator with “the eye of an anthropologist and the humor of a satirist.”  
—USA Today Hailed by Neil Gaiman as “a master of the craft” and Margaret Atwood as “a quintessentially American writer,” Ursula K. Le Guin is at her entertaining, thought-provoking best in this collection of

ingeniously linked stories. Missing a flight, waiting in an airport, listening to garbled announcements—who doesn’t hate that misery? But Sita Dulip of Cincinnati finds a way to bypass the long lines, the crowded restrooms, the nasty food, the whimpering children and domineering parents, the bookless bookstores, the plastic chairs bolted to the floor. . . . With a kind of twist and a slipping bend, easier to do than to describe, Sita travels not to Denver but to Strupsirts, a picturesque region of waterspouts and volcanoes. Or to Djeyo, where she can stay for two nights with a balcony overlooking the amber Sea of Somue. This new method of “changing

planes” enables Sita to visit bizarre societies and cultures that sometimes mirror our own . . . and sometimes open doors into the thrillingly alien. A New York Times Notable Book and Los Angeles Times bestseller, featuring illustrations by Eric Beddows, *Changing Planes* is your boarding pass to fifteen worlds that are vintage Le Guin, from a recipient of the PEN/Malamud Award for excellence in the art of the short story.

Follow the hour hand and minute hand of a clock for 24 hours. How many times do they form a right angle? Timothy's house has several rooms, each of which has an even number of doors,

including doors that lead outside. Is the number of outside doors even or odd? Stimulating and delightful, this collection of puzzles features original and classic brainteasers. The author, a puzzle columnist for *Le Monde*, specially selected these mind-benders for the widest possible audience, ensuring that they're neither too hard for those without a math background nor too easy for the mathematically adept. All puzzles are clearly stated and accurately answered at the back of the book — and they're great fun to consider, whether you crack them or not. Includes a Foreword by Martin Gardner.

Everyone is familiar  
with the dodo and the  
wooly mammoth, but  
how many people have  
heard of the scimitar  
cat and the Falkland  
Island fox? *Extinct  
Animals* portrays over  
60 remarkable animals  
that have been lost  
forever during the  
relatively recent  
geological past. Each

entry provides a concise discussion of the history of the animal—how and where it lived, and how it became extinct—as well as the scientific discovery and analysis of the creature. In addition, this work examines what led to extinction—from the role of cyclical swings in the Earth's climate to the spread of humans and their activities. Many scientists believe that we are in the middle of a mass extinction right now, caused by the human undermining of the earth's complex systems that support life. Understanding what caused the extinction of animals in the past may help us understand and prevent the extinction of species in the future. Extinct Animals

examines the biology and history of some of the most interesting creatures that have ever lived, including: The American Terror Bird, which probably became extinct over 1 million years ago, who were massive predators, some of which were almost 10 feet tall; the Rocky Mountain Locust, last seen in 1902, formed the most immense animal aggregations ever known, with swarms estimated to include over 10 trillion insects; the Giant Ground Sloth, which was as large as an elephant; and the Neandertals, the first Europeans, which co-existed with prehistoric Homo sapiens. Extinct Animals includes illustrations—many created for the work—that help the

reader visualize the extinct creature, and each entry concludes with a list of resources for those who wish to do further research.

"Song of Myself" is a poem by Walt Whitman that is included in his work *Leaves of Grass*. It has been credited as "representing the core of Whitman's poetic vision". The poem was first published without sections as the first of twelve untitled poems in the first (1855) edition of *Leaves of Grass*. The first edition was published by Whitman at his own expense. In 1856 it was called "A Poem of Walt Whitman, an American" and in 1860

it was simply termed "Walt Whitman."

Walter "Walt" Whitman (1819 – 1892) was an American poet, essayist and journalist. His work was very controversial in its time, particularly his poetry collection *Leaves of Grass*, which was described as obscene for its overt sexuality.

**SONG OF MYSELF (The Original 1855 Edition & The 1892 Death Bed Edition)** U of Nebraska Press  
Originally published in 1901, the following

description comes from the first edition: This work, although of a scientific nature, has not been written exclusively for scientists, for the theme is of so universal a scope as to be worthy the attention of all who are concerned in lessening the trials of humanity, or who wish to shape the necessities of life through a more useful and consequently a more happy being. Centuries before the introduction of cocaine to anaesthetic uses, the world had been amazed by accounts of the energy creating properties ascribed to a plant intimately associated with the rites and customs of the ancient Peruvians, and first made known through the chroniclers of Spanish conquest in

America. The history of this plant, known as Coca, is the history of the Incan race and is entwined throughout the associations of the vast socialistic Empire of those early people of Peru. The characteristics and botanical peculiarities of Coca, and the economic uses of plants of the family to which it belongs are described, and an effort is made to harmonize the early uses of the substance - - which are now shown to be of necessity, and not of luxury -- with its present employment, through facts of modern physiology. No effort has been made to make this work in any sense a book of Coca therapy, but a study of the early necessities and the hypothesis

here advanced as to the rationale of its empirical uses will doubtless be ample to impress the true status of Coca, and will suggest its application in the affairs of modern life for conditions similar to those which originally demanded.

Drawing upon a personal collection of more than 300 letters exchanged between her parents and other family members across the U.S.-Mexico border, Miroslava Chavez-Garcia recreates and gives meaning to the hope, fear, and longing migrants experienced in their everyday lives both "here" and "there" (aqui y alla). As private sources of communication hidden from public consumption and

historical research, the letters provide a rare glimpse into the deeply emotional, personal, and social lives of ordinary Mexican men and women as recorded in their immediate, firsthand accounts. Chavez-Garcia demonstrates not only how migrants struggled to maintain their sense of humanity in el norte but also how those remaining at home made sense of their changing identities in response to the loss of loved ones who sometimes left for weeks, months, or years at a time, or simply never returned. With this richly detailed account, ranging from the Mexican Revolution of the 1910s to the emergence of Silicon Valley in the late 1960s, Chavez-Garcia

opens a new window onto the social, economic, political, and cultural developments of the day and recovers the human agency of much maligned migrants in our society today.

At the age of twenty-six, Maarten Troost—who had been pushing the snooze button on the alarm clock of life by racking up useless graduate degrees and muddling through a series of temp jobs—decided to pack up his flip-flops and move to Tarawa, a remote South Pacific island in the Republic of Kiribati. He was restless and lacked direction, and the idea of dropping everything and moving to the ends of the earth was irresistibly romantic. He should have known better. *The Sex Lives of Cannibals* tells the hilarious story of what happens when Troost discovers that Tarawa is not the island paradise he dreamed of. Falling into one amusing misadventure after another, Troost

struggles through relentless, stifling heat, a variety of deadly bacteria, polluted seas, toxic fish—all in a country where the only music to be heard for miles around is “La Macarena.” He and his stalwart girlfriend Sylvia spend the next two years battling incompetent government officials, alarmingly large critters, erratic electricity, and a paucity of food options (including the Great Beer Crisis); and contending with a bizarre cast of local characters, including “Half-Dead Fred” and the self-proclaimed Poet Laureate of Tarawa (a British drunkard who’s never written a poem in his life). With *The Sex Lives of Cannibals*, Maarten Troost has

delivered one of the most original, rip-roaringly funny travelogues in years—one that will leave you thankful for staples of American civilization such as coffee, regular showers, and tabloid news, and that will provide the ultimate vicarious adventure.

"Joni Murphy's inventive and beautiful allegory depicts a city

enmeshed in climate collapse, blinded to the signs of its imminent destruction by petty hatreds and monstrous greed: that is, the world we are living in now. Talking Animals is an Orwellian tale of totalitarianism in action, but the animals on this farm are much cuter, and they make better puns." —Chris Kraus, author of I Love Dick and After Kathy Acker A fable for our times, Joni Murphy's Talking Animals takes place in an all-animal world where creatures rather like us are forced to deal with an all-too-familiar landscape of soul-crushing jobs, polluted oceans, and a creeping sense of doom. It's New York City, nowish. Lemurs brew espresso. Birds tend bar. There are bears on Wall

Street, and a billionaire racehorse is mayor. Sea creatures are viewed with fear and disgust and there's chatter about building a wall to keep them out. Alfonzo is a moody alpaca. His friend Mitchell is a sociable llama. They both work at City Hall, but their true passions are noise music and underground politics. Partly to meet girls, partly because the world might be ending, these lowly bureaucrats embark on an unlikely mission to expose the corrupt system that's destroying the city from within. Their project takes them from the city's bowels to its extremities,

where they encounter the Sea Equality Revolutionary Front, who are either a group of dangerous radicals or an inspiring liberation movement. In this novel, at last, nature kvetches and grieves, while talking animals offer us a kind of solace in the guise of dumb jokes. This is mass extinction as told by BoJack Horseman. This is *The Fantastic Mr. Fox* journeying through Kafka's Amerika. This is dogs and cats, living together. *Talking Animals* is an urgent allegory about friendship, art, and the elemental struggle to change one's life under the low ceiling of capitalism.
