Wireworld Cable Technology was founded with the unique mission of perfecting audio cables through objective listening tests. With the invention of the CES Innovations

Award winning Cable Comparator™ (US Patent 5,740,255), we created a better way to test cables for musical preservation.

MIT Cables - Music Interface Technologies

cables are needed for long-distance power transmission from regions or countries where electric power is generated efficiently at low cost to other regions or countries where there is demand for electric power. The cables are

also used for power transmission to isolated islands where obsolete power generating facilities

Power Cable Technology, Inc. in Moreno Valley, CA ...

Design technologies. The purpose of submarine power cables is the transport of electric current at high voltage. The electric core is a concentric assembly of inner conductor, electric insulation and

protective layers (resembling the design of a coaxial cable). Modern three-core cables (e.g. for the connection of offshore wind turbines) often carry optical fibers for data transmission or temperature measurement, in addition to the electrical conductors.

training courses to transfer knowledge and link theory to day-to-day operations.

Wisdom Cable Technology - wisdom cable technology

I bought a power cable that arrived as promised; it was well packaged. The seller followed up with email and telephone calls with some interesting insights on sound system component and cable selection. Most

important is that the power cable sounded amazing from the first tune played. Two most notable improvements were dynamics and bass punch.

New superconductor technology for the transmission grid Power Cable Technology, Inc. is a California Domestic Corporation filed on May 28, 1987. The company's filing status is listed as Suspended and its File Number is C1588624 .
