 Genius Hour provides educators with the tools that they need to successfully implement Genius Hour, or passion projects, in the classroom. Presented through an easy-to-follow six-step strategy, teachers will utilize the 6 P's—passion, plan, pitch, project, product, and presentation—as a map for students to follow as they create, design, and carry out projects. Students will experience personalized learning through these self-driven projects, application of standards and real-world skills, and opportunities to learn through failure and reflection. The book includes handouts, suggested online resources, and tips and tricks to make the Genius Hour process meaningful for students and manageable for educators, as well as a discussion of Genius Hour's importance and impact on gifted students as they take ownership of their own learning. 2019 Teachers' Choice Award for Professional Development Winner

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Mathematics for Carpentry and the Construction Trades, Third Edition, offers a unique approach based on the authors' experience in building construction and applied education. Loaded with photographs and detailed drawings, the text illustrates the underlying mathematics in each step of the building process. The text's problems, infused with the authors' real industry experience, provide students with relevant examples of problems they will face in the construction and carpentry trades. Problems include step-by-step summary explanations of their solutions with the necessary steps highlighted for easy identification. After giving students a solid foundation in math, the text then leads them through the steps of a construction project and applying the mathematical skills involved in completing the project.
