An integrated view of the principal aspects of immune response to all types of infectious agents, emphasizing the immune system as a host defense system.

* Illustrates how the dialogue between different types of pathogens and the host immune system, as well as the cross-talk between the different members of the immune response, works. * Serves as valuable reading for microbiologists interested in pathogenesis and immunology; clinicians

with an interest in immunology, virology, vaccine development, infectious diseases, bacteriology, parasitology, pathology, and cell biology; and immunologists wanting to expand their knowledge of infectious diseases and their causative agents.

 Follow two abolitionists
 who fought one of the
 most shockingly
 persistent evils of the
 world: human
 trafficking and sexual
 exploitation of slaves.
 Told in alternating
 chapters from
 perspectives spanning
 more than a century
 apart, read the riveting
 19th century first-hand
 account of Harriet
 Jacobs and the
 modern-day
 eyewitness account of
 Timothy Ballard.
 Harriet Jacobs was an
 African-American, born
 into slavery in North
 Carolina in 1813. She
 thwarted the sexual
 advances of her master
 for years until she
 escaped and hid in the
 attic crawl space of her
 grandmother's house
 for seven years before

escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children

from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. *Short Black* CRC Press! What would you do if you discovered your whole life to be a lie?

Daniel Henstock thinks he's an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world's first one-hundred percent genetically-engineered human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go 'off-grid'. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her, Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is

hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ...

TIBERIUS FOUND is the first instalment in a thrilling series - The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.

This classic textbook by Eberhard Sturm is the only up-to-date PL/I book currently available in the English language which shows the range of the new PL/I on the computer platforms OS/2, Windows, AIX and z/OS - the basis being the new PL/I compiler from IBM. The language was

extended by the package concept, abstract data types, attributes to communicate with C programs and more than a hundred BUILTIN functions. The book provides the basis for certification as an "IBM Certified PL/I Programmer/Developer". Suitable for self-study, it introduces all areas of the language. It is a useful source of ideas and information for those programmers

who already have a certain level of experience as well as those who only want to discover the variety of new language features.
