The highly acclaimed MEI series of text books, supporting OCR's MEI Structured Mathematics specification, has been updated to match the requirements of the new specifications, for first teaching in 2004. This series, well-known for accessibility and for a student friendly approach, has a wealth of features: worked examples, activities, investigation, graded exercises, Key Points summaries and Discussion points. To ensure exam success there are plenty of up to date exam questions, plus warning signs to indicate common pitfalls. MEI offer full support to schools through their network with newsletters, training days and an annual conference. Further Pure Mathematics 2 is an A2 component of Further Mathematics.

MEI A Level Mathematics Year 2 4th Edition Hodder Murray

This book contains 12 exam papers with answers and it is aimed at June 2021 A Level Mathematics examination. These papers are written according to the new 2017 syllabus. Each section contains 3 exam papers labeled Pure Mathematics 1, Pure Mathematics 2 & Statistics and Mechanics which are similar to the actual exam.

MEI A Level Mathematics Year 2 Hachette UK

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

MEI A Level Further Mathematics Hachette UK

Here I offer a complete Lesson on Maths A level suitable to Edexcel C3 Trigonometry-Further trigonometric identities and their applications. This set of notes completely covers the chapter with 162 worked examples. With over 20 years experience in teaching A Level (Pure Mathematics and Mechanics), I offer these notes covering a wide range of problems with complete solutions. In this way I hope to help students achieve a high score in their A Level Maths examination. Each Lesson covers theory and formula necessary for the chapter and step by step explanation of all solutions. Problems are arranged in an ascending order of difficulty reaching A level standard. Applies also for any students studying at this level. A continuation of C2-trigonometry Lesson with more advance problems. It includes: 1) Definition of $\cot x$, $\sec x$, $\operatorname{cosec} x$. 2) Use of identities such as: a) $\tan \operatorname{DEGREES}2(x)+1=\sec \operatorname{DEGREES}2(x)$ b) $\cot \operatorname{DEGREES}2(x)+1=\operatorname{cosec} \operatorname{DEGREES}2(x)$ Further Identities such as $\sin 2x$, $\cos 2x$, $\tan 2x$. Prove of the above identities. 3) Exercises involving double angles and half angles. 4) Use of $\sin(A+B)$, $\cos(A+B)$, $\tan(A+B)$, $\sin(A-B)$..etc Use of these formula to evaluate without the use of calculator, and using standard angles the exact answers of ie $\cos 15$ etc 5) Extensive covering of proving identities involving also cases such $\sin 3x$, $\cos 3x$, $\tan 3x$ etc 6) Solution of more advanced trigonometric equations. (Application of general solutions for a certain interval). 7) Solution of the trigonometric equation: $a \cos x + b \sin x = c$, where a, b and c are constants. 8) Eliminating the angle from a set of equations and finding an expression for $y=f(x)$. ie eliminate the angle from the set of equations $x=2\cos A+1$ and $y=3\sin A-2$. Use of the trigonometric identities. 9) Converting sums to products and products to sums. Use of such formula to solve different trigonometric problems.

MEI Further Maths: Extra Pure Maths Hodder Education

"This book is for students working towards A Level Mathematics. Together with Book 1 it covers all the Pure Mathematics necessary for the full A level. It can be used in the classroom, and also contains sufficient explanations and worked examples for students working on their own. The exercises are plentiful, and graded in difficulty, to allow students to build confidence where necessary, and to extend themselves where possible. The work is collected into sections on Algebra, Coordinate Geometry, Binomial Expansion, Calculus, Trigonometry, Exponentials and Logarithms, Vectors and Proof, in line with the 2017 syllabus, and is suitable for use by students studying under any of the main examination boards."--Page v.

MEI A Level Mathematics Year 1 (AS) 4th Edition Hachette UK

Written to match the MEI specification, this text covers the content of the pure mathematics 6 module, in which five areas of mathematics are developed to some depth. The content is especially appropriate for those going on to read mathematics, or subjects containing a substantial amount of mathematics, at university. The topics covered in this book are: limiting processes, multi-variable calculus, vectors and matrices, differential geometry, and abstract algebra.

Pure Mathematics 5 Hachette UK

Each component in the MEI Structured Mathematics scheme is supported by a single tailor-made book, which covers the element of the corresponding component to exactly the required level, adopts an approach consistent with the MEI philosophy, provides examples in real contexts to illustrate the ideas and techniques covered in the component, provides structured exercises and open-ended activities to consolidate understanding and build confidence, and prepares students appropriately for the component assessment.
