OLSAT Practice Test - Level F Simon and Schuster

This report on the educational needs of American gifted and talented students identifies indicators of an educational crisis, describes the current status of education for these students, and presents recommendations to meet the educational needs of these students. Indicators demonstrating the need for change include the relatively poor performance by American students on international tests and the small number of students performing at the highest levels on National Assessment of Educational Progress tests. Recent studies have shown that gifted and talented elementary school students have mastered 35-40% of the curriculum in five basic subjects before they begin the school year; most regular classroom teachers make few, if any, provisions for talented students; highest achieving students study less than an hour a day; and only 2 cents out of every \$100 spent on K-12 education supports

special opportunities for talented students. A review describes how gifted and talented students are currently identified, the number of students served, the kind of support available, the kind of education most gifted and talented students receive, and characteristics of effective programs for these students. Seven recommendations are offered: (1) set challenging curricular standards; (2) establish high-level learning opportunities; (3) ensure access to early childhood education; (4) increase learning opportunities for disadvantaged and minority children with outstanding talents; (5) broaden the definition of gifted (a broadened definition based on the federal Javits Gifted and Talented Education Act is offered); (6) encourage appropriate teacher training and technical assistance; and (7) match world performance.
