Information technology affects all aspects of modern life. From the information shared on social media such as Facebook, Twitter, and Instagram to online shopping and mobile devices, it is rare that a person is not touched by some form of IT every day. Information Technology Law examines the legal dimensions of these everyday interactions with technology and the impact on privacy and data protection, as well as their relationship to other areas of substantive law, including intellectual property and criminal proceedings. Focusing primarily on developments within the UK and EU, this book provides a broad-ranging introduction and analysis of the increasingly complex relationship between the law and IT. Information Technology Law is essential reading for students of IT law and also appropriate for business and management students, as well as IT and legal professionals. Online resources

An Introduction to Legal Theory Oxford University Press, USA

Building on earlier work in the anthropology of law and taking a critical stance toward it, June Starr and Jane F. Collier ask, "Should social anthropologists continue to isolate the 'legal' as a separate field of study?" To answer this question, they confront critics of legal anthropology who suggest that the subfield is dying and advocate a reintegration of legal anthropology into a renewed general anthropology. Chapters by anthropologists, sociologists, and law professors, using anthropological rather than legal methodologies, provide original analyses of particular legal developments. Some contributors adopt an interpretative approach, focusing on law as a system of meaning; others adopt a materialistic approach, analyzing the economic and political forces that historically shaped relations between social groups. Contributors include Said Armir Arjomand, Anton Blok, Bernard Cohn, George Collier, Carol Greenhouse, Sally Falk Moore, Laura Nader, June Nash, Lawrence Rosen, June Starr, and Joan Vincent.

A New Introduction to Legal Reasoning GRIN Verlag

This book presents a unified set of arguments about the nature of jurisprudence and its relation to the jurist's role. It explores contemporary challenges that create a need for social scientific perspectives in jurisprudence, and it shows how sociological resources can and should be used in considering juristic issues. Its overall aim is to redefine the concept of sociological jurisprudence and outline a new agenda for this. Supporting this agenda, the book elaborates a distinctive juristic perspective that recognises law's diversity of cultural meanings, its extending transnational reach, its responsibilities to reflect popular aspirations for justice and security, and its integrative tasks as a general resource of regulation for society as a whole and for the individuals who interact under law's protection. Drawing on and extending the author's previous work, the book will be essential reading for students, researchers and academics working in jurisprudence, law and society, socio-legal studies, sociology of law, and comparative legal studies.

The Judicial Process: Law, Courts, and Judicial Politics is an all-new, concise yet comprehensive core text that introduces students to the nature and significance of the judicial process in the United States and across the globe. It is social scientific in its approach, situating the role of the courts and their impact on public policy within a strong foundation in legal theory, or political jurisprudence, as well as legal scholarship. Authors Christopher P. Banks and David M. O'Brien do not shy away from the politics of the judicial process, and offer unique insight into cutting-edge and highly relevant issues. In its distinctive boxes, "Contemporary Controversies over Courts" and "In Comparative Perspective," the text examines topics such as the dispute pyramid, the law and morality of same-sex marriages, the "hardball politics" of judicial selection, plea bargaining trends, the right to counsel and "pay as you go" justice, judicial decisions limiting the availability of class actions, constitutional courts in Europe, the judicial role in creating major social change, and the role lawyers, juries and alternative dispute resolution techniques play in the U.S. and throughout the world. Photos, cartoons, charts, and graphs are used throughout the text to facilitate student learning and highlight key aspects of the judicial process.

Sociological Jurisprudence Oxford University Press

This book provides an account and explanation of a fundamental dilemma facing secular states: the 'legitimacy gap' left by the withdrawal of religion as a source of legitimacy. Legitimacy represents a particular problem for the secular state. The 'secular' in all its manifestations is very much linked to the historical rise of the modern state. It should not be seen as a category that separates culture and religion from politics, but rather as one that links these different dimensions. In the first part of

the book, Depaigne explains how modern constitutional law has moved away from a 'substantive' legitimacy, based in particular on natural law, towards a 'procedural' legitimacy based on popular sovereignty and human rights. Depaigne examines three case studies of constitutional responses to legitimacy challenges which articulate the three main sources of 'procedural' legitimacy (people, rights, and culture) in different ways: the 'neutral model' (constitutions based on the 'displacement of culture'); the 'multicultural model' (constitutions based on diversity and pluralism); and the 'asymmetric model' (constitutions based on tradition). Even if secularization can be considered European in its origin, it is best seen today as a global phenomenon, which needs to be approached by taking into account the particular cultural dimension in which it is rooted. Depaigne's detailed study shows how secularization has moved either towards 'nationalization' linked to a particular national identity (as in France and, to some extent, in India)-or towards 'de-secularization', whereby secularism is displaced by particular cultural norms, as in Malaysia.
