In this textbook we see heritage in action in indigenous and vernacular communities, in urban development and regeneration schemes, in expressions of community, in acts of nostalgia and memorialization and counteracts of forgetting, in museums and other spaces of representation, in tourism, in the offices of those making public policy, and in the politics of identity and claims toward cultural property. Whether renowned or local, tangible or intangible, the entire heritage enterprise, at whatever scale, is by now inextricably embedded in “value”. The global context requires a sanguine approach to heritage in which the so-called critical stance is not just theorized in a rarefied sphere of scholarly lexical gymnastics,

but practically engaged and seen to be doing things in the world.

Set in the grim valleys of the Welsh iron country during the turbulent times of the Industrial Revolution, this unforgettable novel begins the saga of the Mortymer family - a family of hard men and beautiful women, all forced into a bitter struggle with their harsh environment, as they slave and starve

for the cruel English ironmasters. But adversity could never still the free spirit of Wales, or quiet its soaring voice, and the Mortymers struggle on even as the iron foundries ravish their homeland and cripple their people. Rape of the Fair Country launched the bestselling career of Alexander Cordell in 1959 and went on to sell millions of copies in seventeen languages throughout the world.

Sir Thomas Lewis has become one of the greatest cardiologists of this century. He was foremost in using the newly invented electrocardiograph to diagnose heart disease and was a pioneer of cardiac electro-physiology. This is the first biography of Sir Thomas Lewis, who became famous, whilst still quite young,

for his outstanding pioneer work in electrocardiography. It recounts the scientific career of Lewis, together with accounts of his hospital work and teaching, and his family life and hobbies. There are over 100 illustrations including Lewis and his co-workers, and much of the information about Lewis has been derived from first hand accounts by his former associates. This biography appeal to cardiologists and to those physicians, surgeons and research workers with a special interest in the skin, pain and vascular disease, as well as clinical physiologists and medical historians.

This account by Edward Morgan traces the life and ministry of John Elias from his first religious impressions until the day when 10,000 attended his funeral in Anglesey, the scene of most of his labours. Here, in days of revival, forty-four chapels were built in forty years. To Elias' life and the lessons to be drawn from it are added his letters and other papers originally published as a separate volume.
