Phraseology, as explored in corpus linguistics, is important to the study of evaluative language. Corpus techniques reveal this phraseology and so assist in, for example, identifying modal meaning and intensifying phrases. The patterns identified by corpus techniques can be used in identifying and parsing instances of evaluation.

Simon and Schuster Advice Online presents a comprehensive study of advice-giving in one particular American Internet advice column, referred to as 'Lucy Answers'. The discursive practice investigated is part of a professional and educational health program managed by an American university. The study provides insights into the linguistic realization of both asking for and giving advice in a written form and thus adds to the literature on advice columns as a specific

text genre, on advice in health care contexts, and on Internet communication. The book offers a comprehensive literature review of advice in health encounters and other contexts, and uses this knowledge as a basis for comparison. *Advice Online* demonstrates how qualitative and quantitative research methods can be successfully combined to arrive at a comprehensive analysis of a discursive practice. It provides essential information on advice-giving for researchers, academics and students in the fields of (Internet) communication, media studies, pragmatics, social psychology and counseling. Health educators who work for

advice columns or use similar forms of communication will also benefit from the insights gained in this study.
