This comprehensive and

engaging text, developed in cooperation with the IB, follows the new curriculum for first assessment in 2022. With accessible, engaging lessons students will actively relate economics to real-world issues and the global economy. The international examples and case studies encourage students to analyse economics in terms of present-day challenges and concerns. Conceptual links are provided to help students understand the over-arching big questions that

relate economics to the multi-faceted challenges of the world economy including how it works and changes over time. Through inquiry-based tasks and links to TOK and ATL activities students will gain a deep understanding of economics. Practice activities will develop the skills required to succeed in the IB assessment including exam-style questions and data response questions. Clear explanations will help students achieve assessment success.

Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed

lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes

easy-to-implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms.

 There is a well-known

conundrum concerning
 Jewish history: The
 conventional chronology
 of the Western world -
 and academia - is in direct
 conflict with traditional
 Jewish sources over the
 history of ... history.
 Incredibly, there is a gap
 of roughly 200 years: For
 instance, the Talmud says
 the Second Temple stood
 for roughly 400 years,
 while mainstream
 historians today conclude
 that it stood for almost
 600 years. This conflict
 has major implications on
 what occurred to who,
 and when. It also seems

to question the accuracy
 of the entire Jewish
 tradition as accepted
 dating methods seem to
 contradict core parts of
 the traditional Jewish
 narrative. In presenting
 fresh and startling
 astronomical,
 mathematical and
 archaeological evidence,
 Rabbi Alexander Hool has
 charted new ground in his
 quest to find the solution
 to this ancient problem.
 The Challenge of Jewish
 History is revolutionary: it
 questions all assumptions,
 dispels unfounded myths,
 and transports us back in

time over 2,500 years. With a subject of great significance and fascination to all those interested in history, and a wealth of scholarship and sources to impress academics, this intriguing book gives us a new perspective on Jewish-and world - history.
