(Piano Instruction). Fundamentals of Piano Technique was developed by Leon Conus (1871-1944) and Olga Conus (1890-1976) during many decades of teaching and performing, and through association with the most prominent Russian musicians of the time including Rachmaninoff, Scriabin, and Medtner. The exercises in this method are concise and efficient, focusing on the elements of good playing: control, touch, nuance,

and musicianship. This book can be used by students at all levels of development, and with all shapes and sizes of hands. The preparatory exercises allow students to begin using the book within their first year of lessons. A systematic approach allows the hands to develop gradually, avoiding dangerous tension or muscle damage. Topics include: preparatory exercises; extension exercises; five-finger exercises; flexibility of the thumb; trill exercises; scales & arpeggios; wrist development; double notes; and more. Now you can master Bach's most beautiful prelude—even if you've never

sat down at a piano before! Do you have a piano (or keyboard) and forty-five spare minutes every day? Then spend the next six weeks with acclaimed concert pianist James Rhodes. By the end, you'll be able to perform Bach's Prelude No. 1 in C major—no prior musical experience required! Rhodes reveals How to Play the Piano step by step—how to read the treble and bass clefs as well as sharp and flat notes, and then how to practice—before teaching the Prelude in easy, bite-size segments. His method is free of tedious drills, and filled with inspiration: "If listening to music is soothing for the soul, then playing music is achieving enlightenment." Before you know it, not only will you have learned how to play one of Bach's most beloved

masterpieces—you also will have unleashed your creativity, exercising your mind (and fingers) and accomplishing something you never thought possible. Bravo! Includes four instructional videos supported by select e-reader devices.

An essential resource for scholars and

performers, this study by a world-renowned specialist illuminates the piano music of four major French composers, in comparative and reciprocal context. Howat explores the musical language and artistic ethos of this repertoire, juxtaposing structural analysis with editorial and performing issues. He also relates his four composers historically and stylistically to such predecessors as Chopin, Schumann, Liszt, the French harpsichord school, and Russian and Spanish music. Challenging long-held assumptions about performance practice, Howat elucidates the rhythmic vitality and invention inherent in French music. In granting Fauré and Chabrier equal consideration with Debussy and Ravel, he redresses a historic imbalance and

reshapes our perceptions of this entire musical tradition. Outstanding historical documentation and analysis are supported by Howat's direct references to performing traditions shaped by the composers themselves. The book balances accessibility with scholarly and analytic rigor, combining a lifetime's scholarship with practical experience of teaching and the concert platform *Fundamentals of Piano Practice* Createspace Independent Publishing Platform

So many of the great pianists and teachers have come out of Poland and Russia (Rubinstein, Anton as well as Arthur, Leschetizky, Paderewski, the Lhevannes, Gilels, Richter, and others), yet we know little about their methods of learning and teaching. George

Kochevitsky in *The Art of Piano Playing* supplies some important sources of information previously unavailable in the United States. From these sources, tempered by his own thinking, Kochevitsky formulated a scientific approach that can solve most problems of piano playing and teaching. George Kochevitsky graduated in 1930 from Leningrad Conservatory and did post-graduate work at Moscow Conservatory. After coming to the U.S., he taught privately in New York City, gave a number of lectures, and wrote for various music periodicals.

Rubinstein is considered Liszt's only possible rival on the concert stage while Carrentilde;o is the foremost woman pianist of the late 19th century.

Together, they discuss "the soul of the piano": the art of piano pedaling.

Rubinstein's technique is explored through works he performed in 1885-6.

Carrentilde;o's observations explore her sensitivity made possible through combinations of touch and pedal.
