Hacking Into Heaven
Simon and Schuster
Hacking into Heaven explains how many stories and images from the Bible are encrypted references to the mushroom, *Amanita muscaria* - the real God of the Bible. Pem Das demonstrates how Biblical scribes used ironic schemes to convey a dual message; a literal message taken at face value by the slave class,

and a deeper message implied in the story understood by the elite class; and how this linguistic model replaced the chains of slavery with written words. According to Dangwillo the Tree of Knowledge of Good and Evil, the original Ten Commandments, Noah's Ark, and Jesus are representations of the mushroom; and the ecstasy it provides.

"Written language is a technology, and I wanted to show how it's used to control human behavior. When I started this book it was about linguistics and rhetoric, but now that I am finished it's about biology and neurology. Psilocybin mushrooms have been proven to stimulate neurogenesis in the hippocampus, that's the creation of new neurons in the place in your brain responsible for language, location, and memory," said Das. "And the same thing happens when a child is born through natural child birth. Kind of gives new meaning to being a Born Again Christian. This is science. This is an idea whose time has come." *Hacking into Heaven* is a short book that covers the Old Testament, Gnostic texts, and the New Testament.

Included are chapters covering Mycology, or the biology of mushrooms; a short essay Language, Religion, and Slavery, which offers a model of how written language is used to subjugate the human mind; *Spelunking into Plato's Cave*, offers an explanation of Plato's allegory of the cave; and, *A Neuro-linguistic Model for Amanita Ecstasy*; offers an explanation of how mushroom ecstasy affects linguistic patterns in the brain.

Depression and its Treatment focuses on medical interventions in the diagnosis and treatment of depression, as well as identification of symptoms and possible mechanisms of treatment. The book first offers information on the concept and classification of depression, physiology and psychopathology, and clinical types of depression, including classification of depressive illnesses and etiology. The publication then takes a look at the treatment of psychological and physiological depression and complications of depression and their treatment. The text ponders on the prognosis of psychological and

physiological depression and critique of existing terminology, as well as illustrative case histories of depression. The manuscript is highly recommended for clinicians and psychiatrists wanting to explore the approaches in the treatment of depression.

Media Design and Technology for Live Entertainment is a guide to understanding the concepts and equipment used in projection and video design for live performances. After an introduction in the principles of design elements as well as information on content, this book focuses on how content is used and transmitted by describing the essential components of systems, providing definitions used in communicating video concepts, and including basic system troubleshooting tips and tricks. A brief history of projected imagery is included, as well as information on analog systems, as outdated technology continues to

be used either by choice of the designer or by necessity due to budget. By providing the information to understand the tools and how to use them, the reader should be able to create their own systems to meet his or her design ideas.

Like travelers in a foreign land, Mac users working in Windows or Windows users working on a Mac often find themselves in unfamiliar territory with no guidebook. *Crossing Platforms: A Macintosh/Windows Phrasebook*, with information presented in a translation dictionary-like format, offers users a handy way of translating skills and knowledge from one platform to the other. Whether it's explaining the difference between Macintosh aliases and Windows shortcuts or explaining how a Windows user would go about setting up Internet access on a Mac, this book provides readers a simple means to look up familiar interface elements and system features and learn how that element or feature works on the other platform. *Crossing*

Platforms: A Macintosh/Windows Phrasebook includes: A general introduction to the key differences between the Mac and Windows A to Z sections for each platform: one section where Mac users look up familiar Macintosh terms to find the equivalent function in Windows along with an explanation of the differences; and another section where Windows users find familiar Windows terms with pointers to the Macintosh equivalent along with full descriptions of how the function works on the Mac and important differences between the two platforms The complete translation dictionary-like reference book, Crossing Platforms: A Macintosh/Windows Phrasebook provides a simple solution for everyone who has been confused and frustrated by the arbitrary and sometimes capricious differences between the Macintosh and Windows operating systems. Psychology for Teachers

Butterworth-Heinemann

Judy Nunn's exciting new
novel, a no.1 bestseller, is
inspired by a true wartime
story that has remained a
well-kept secret for over
seventy years. It seems to
have happened overnight,
Val thought . How
extraordinary. We've
become a khaki town. It's
March 1942. Singapore
has fallen. Darwin has
been bombed. Australia is
on the brink of being
invaded by the Imperial
Japanese Forces. And Val
Callahan, publican of The
Brown's Bar in Townsville,
could not be happier as
she contemplates the
fortune she's making from
lonely, thirsty soldiers.
Overnight the small
Queensland city is
transformed into the
transport hub for 70,000
American and Australian
soldiers destined for
combat in the South
Pacific. Barbed wire and
gun emplacements cover
the beaches. Historic
buildings are
commandeered. And the
dance halls are in full
swing with jazz, jitterbug
and jive. The Australian

troops begrudge the
confident, well-fed 'Yanks'
who have taken over their
town and their women.

There's growing conflict,
too, within the American
ranks, because black GIs
are enjoying the absence
of segregation. And the
white GIs don't like it. As
racial violence explodes
through the ranks of the
military, a young United
States Congressman,
Lyndon Baines Johnson, is
sent to Townsville by his
president to investigate.
'Keep a goddamned lid on
it, Lyndon,' he is told, 'lest
it explode in our faces ...'
