Questions regarding the formation of the Universe and what was there before the existence of Early Universe have been great interest to mankind of all times. In recent decades, the Big Bang as described by the Lambda CDM-Standard Model Cosmology has become widely accepted by majority of physics and cosmology communities. Among other things, we can cite A.A. Grib Pavlov who pointed out some problems of heavy particles creation out of vacuum and also other proposal of Creatio ex nihilo theory (CET).

Since the Niels Bohr centenary of 1985 there has been an astonishing international surge of scholarly analyses of Bohr's philosophy. Now for the first time in Niels Bohr and Contemporary Philosophy Jan Faye and Henry Folse have brought together sixteen of today's leading authors who have helped mould this new round of discussions on Bohr's philosophy. In fifteen entirely new, previously unpublished essays we discover a surprising variety of the different facets of Bohr as the natural philosopher whose 'framework of complementarity' shaped the final phase of the quantum revolution and influenced two generations of the century's leading physicists. There is much on which the authors included here agree; but there are also polar disagreements, which assure us that the philosophical questions revolving around Bohr's 'new viewpoint' will continue to be a subject of scholarly interest and discussion for years to come. This collection will interest all serious students of history and philosophy of science, and foundations of physics.

The much-awaited "Sample Papers for Physics-XII by VK Global Publications are on their way." The practice papers in this booklet are designed per the specimen paper released by the CBSE board to give its readers an edge over the others in preparing for the CBSE examinations in 2023. Some salient features of this book are as follows: This sample paper booklet begins with the Important Formulae of each chapter, providing a snapshot of the entire chapter and hence facilitating the purpose of last-minute revisionary notes needed by the students. < > To help students practice and evaluate their understanding, detailed solutions of the CBSE Sample Paper 2023 have been incorporated in this booklet and a total of 15 sample papers. Out of these 15 sample papers, five papers include detailed step-by-step solutions, and the remaining ten papers are for practice of the students

(answers for objective type questions and numerical have been included for these practice papers as well). A blueprint based on the specimen paper released by the CBSE Board has also been included in this booklet to enable the students to gauge the unit-wise weightage and the marking scheme of the paper. Effort has been made to design each sample paper based on the CBSE
