This set contains Dishonorable, Corruptible and Unhinged, the complete stories of the Amado Brothers! Dishonorable Sofia I didn't know Raphael Amado when he turned up on our doorstep demanding restitution for an old debt. My grandfather knew him well, though, and he quickly conceded. That restitution? Me. Six months later, on my eighteenth birthday, Raphael came to claim me. He stole me from my home, taking me to his Tuscan estate, where from the crumbling chapel to the destroyed vineyard to that dark cellar, the past stalked him like a shadow. Even the walls held secrets here and I'd need to uncover them all to

survive. Because taking me was only the beginning of his plan. Raphael Sofia was the sacrifice to pay for her grandfather's sins. She accused me of being the devil. And she's right. But the truth was, he betrayed her. And when the time came to promise to love, cherish, and obey she spoke the words that would seal her fate. I do. We have a common enemy, though, my unwilling bride and I. But even the devil protects what's his. And she's mine. She just doesn't yet know how much protecting she needs. Corruptible When I disappeared out of Lina Guardia's life years ago, it was for her own good. She was too young. Too corruptible. Now our paths cross again. But things are different. She's got secrets. Dangerous ones. She thinks she can keep me out of her world, but she's in over her head and needs a protector. I just have to remember I can't be more than that to her. I can't give in to the temptation. Because in six months, I'll be a priest. And she

complicates things. *Author's Note: Corruptible was originally published with the title Disgraced. Unhinged Eve Two years ago, I made a deal with the devil. That night, I lost everything. That night, I thought he died. But he's back. Risen, like Lazarus, from the dead. And he thinks I betrayed him. The way he looks at me should terrify me, but I'm drawn to him. I always have been. Even now. Even though I know if I'm not careful, his obsession will destroy us both. Zach I should have died that night two years ago. My mistake cost my men their lives. It should have cost me mine. But I survived. And the day I learned Eve did too, I made it my mission to find her. I sought her out. Found her living her new life. I've been inside her house. Eaten her food. I've stood beside her bed and watched her sleep. She has so many secrets, and I know one of them. It's the one where our pasts collide. The one that destroyed me. And it's the reason I've come for her. I never intended to touch her, but I did. And now that I've had a taste, I want more. I want her.

Public Technology Procurement and Innovation studies public technology procurement as an instrument of innovation policy. In the past few years, public technology procurement has been a relatively neglected topic in the theoretical and research literature on the economics of innovation. Similarly, preoccupation with 'supply-side' measures has led policy-makers to avoid making very extensive use of this important 'demand-side' instrument. These trends have been especially pronounced in the European Union. There, as this book will argue, existing legislation governing public procurement presents obstacles to the use of public technology procurement as a means of

stimulating and supporting technological innovation. Recently, however, there has been a gradual re-awakening of practical interest in such measures among policy-makers in the EU and elsewhere. For these and other related measures, this volume aims to contribute to a serious reconsideration of public technology procurement from the complementary standpoints of innovation theory and innovation policy.

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

The neem tree, one of the most promising of all plants, may eventually benefit every person on the planet. Probably no other plant yields as many varied products or has as many exploitable by-products. Indeed, as foreseen by some scientists, this tree may usher in a new era in pest control; provide millions with inexpensive medicines; cut the rate of population growth; and perhaps even reduce erosion, deforestation, and the excessive temperature of an overheated globe. On the other hand, although the enthusiasm may be justified, it is largely founded on exploratory investigations and empirical and anecdotal evidence.

The purpose of this book is to marshal the various facts about this little-known species, to help illuminate its future promise, and to speed realization of its potential.

In June 2019, the Committee on the Judiciary initiated a bipartisan investigation into the state of competition online, spearheaded by the Subcommittee on Antitrust, Commercial and Administrative Law. As part of a top-to-bottom review of the market, the Subcommittee examined the dominance of Amazon, Apple, Facebook, and Google, and their business practices to determine how their power affects our economy and our democracy. Additionally, the Subcommittee performed a review of existing antitrust laws, competition policies, and current enforcement levels to assess whether they are adequate to address market power and anticompetitive conduct in digital markets. Over the course of our investigation, we collected extensive evidence from these companies as well as from third parties—totaling nearly 1.3 million documents. We held seven hearings to review the effects of market power online—including on the free and diverse press, innovation, and privacy—and a final hearing to examine potential solutions to concerns identified during the investigation and to inform this Report's recommendations. A year after initiating the investigation, we received testimony from the Chief Executive Officers of the investigated companies: Jeff Bezos, Tim Cook, Mark Zuckerberg, and Sundar Pichai. For nearly six hours, we pressed for answers about their business practices, including about evidence concerning the extent to which they have exploited, entrenched, and expanded their power over digital markets in anticompetitive

and abusive ways. Their answers were often evasive and non-responsive, raising fresh questions about whether they believe they are beyond the reach of democratic oversight. Although these four corporations differ in important ways, studying their business practices has revealed common problems

This isn't love. It's business. I knew this day would come long before my parents informed me of my engagement to Shaw LeBlanc. I was brought up with the knowledge I'm nothing more than a pawn in my father's game. This wedding is about money and political gain, the exchange of power and sex. Not love or an inability to spend our lives without each other. During the planning of the wedding, I brainwashed my heart into believing I loved a man I hardly knew. I had to. My father needs Lou LeBlanc's money. Lou wants my father's ties in Washington. His son wants me. Destiny sealed. I was prepared to sacrifice my freedom and happiness for my family. Then I overheard something I shouldn't have. Now I'm aimlessly wandering barefoot through the streets of the French Quarter, scared, alone, unsure of tomorrow... Until I see a sign that'll change my fate forever. This is a standalone novel in a series of standalones. 18+ MATURE AUDIENCES ONLY. This book contains sexy situations, bad words, and heavy subject matter.

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*,

Kimmerer brings these two lenses of knowledge together to take us on “a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the Northern Hemisphere. Anna Lowenhaupt Tsing's account of these sought-after fungi offers insights into areas far beyond just mushrooms and addresses a crucial question: What manages to live in the ruins we have made? The Mushroom at the End of the World explores the unexpected corners of matsutake commerce, where we encounter Japanese gourmets, capitalist traders, Hmong jungle fighters, Finnish nature guides, and more. These companions lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human devastation. The Mushroom at the End of the World delves into the relationship between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

#1 New York Times Bestseller From Liane Moriarty, the #1 New York Times bestselling author of *Big Little Lies* and *Nine Perfect Strangers*, comes *Apples Never Fall*, a novel that looks at marriage, siblings, and how the people we love the most can hurt us the deepest. The Delaney family love one another dearly—it's just that sometimes they want to murder each other . . . If your mother was missing, would you tell the police? Even if the most obvious suspect was your father? This is the dilemma facing the four grown Delaney siblings. The Delaneys are fixtures in their community. The parents, Stan and Joy, are the envy of all of their friends. They're killers on the tennis court, and off it their chemistry is palpable. But after fifty years of marriage, they've finally sold their famed tennis academy and are ready to start what should be the golden years of their lives. So why are Stan and Joy so miserable? The four Delaney children—Amy, Logan, Troy, and Brooke—were tennis stars in their own right, yet as their father will tell you, none of them had what it took to go all the way. But that's okay, now that they're all successful grown-ups and there is the wonderful possibility of grandchildren on the

horizon. One night a stranger named Savannah knocks on Stan and Joy's door, bleeding after a fight with her boyfriend. The Delaneys are more than happy to give her the small kindness she sorely needs. If only that was all she wanted. Later, when Joy goes missing, and Savannah is nowhere to be found, the police question the one person who remains: Stan. But for someone who claims to be innocent, he, like many spouses, seems to have a lot to hide. Two of the Delaney children think their father is innocent, two are not so sure—but as the two sides square off against each other in perhaps their biggest match ever, all of the Delaneys will start to reexamine their shared family history in a very new light.

This book discusses the depictions of the cult and its personnel in the twelve prophetic books commonly referred to as "The Book of the Twelve" or "The Minor Prophets." The articles in the volume explore the following questions: How did these prophetic writers envision the priests and the Levites? What did they think about the ritual aspects of ancient Israelite faith, including not only the official temple cult in Jerusalem but also cultic expressions outside the capital? What, in their views, characterized a faithful priest and what should the relationship be between his cultic performance and the ways in which he lived his life? How does the message of each individual author fit in with the wider Israelite traditions? Finally, who were these prophetic authors, in which historical contexts did they live and work, and what stylistic tools did they use to communicate their message?

American Military History provides the United States Army-in-particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January

2009.

An Introvert in an Extrovert World: Essays on the Quiet Ones is a multi-disciplinary anthology about introversion in the world of extroversion. Susan Cain's book, Quiet, recently addressed the complexities of an issue that was initially raised by Carl Jung, and this anthology expands the analysis of the challenges faced by those who are considered to be introverts - those who prefer reading to partying, listening to speaking - living in a world of people who cannot understand their quieter ways. Introverts are innovative and make significant contributions, but dislike self-promotion. They derive their energy from quiet rejuvenation, as opposed to acquiring renewed energy from being surrounded by, and interacting with, multitudes of people. That they are typically labeled "quiet" often suggests negative connotations. However, from Van Gogh's Sunflowers to the invention of the personal computer, the contributions of the "quiet ones" have made an immeasurable and invaluable impact on our society. An Introvert in an Extrovert World contains analyses of popular culture, literature, television, film, and social media, as well as poignant personal narrative examples of the lives of these two contrasting personality types. Examples of the pain, conflict, repression, and even humor related to introversion in everyday life are manifested in this collection of articles that span the spectrum of

human nature. The volume looks at the unlikely professions that the populace would attribute to the introvert: from teacher/professor and actor to politician and even gladiator. The reader is given an understanding of different characters in literary works and their connection to introversion, visits the spectrum of social media and the pluses and minuses therein, and is provided with examples of how to promote one's writing for publication whilst being an introvert. Within the pages of this book, there are many and varied topics and intuitive insights traversing several situations that relate to the "quiet" world of introversion.

This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the

whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.
