Course. Fundamental Human Form and Function (ES 207) Book title Seeley's Essentials of Anatomy and Physiology; Author Seeley's Essentials of Anatomy & Physiology Chapter 7 - UB ... 7.1 Divisions of the Skeletal System . The skeletal system includes all of the bones, cartilages, and ligaments of the body. It serves to support the body, protect the brain and other internal organs, and provides a rigid structure upon which muscles can pull to generate body movements. Ch. 7 Chapter Review - Anatomy and Physiology | OpenStax Chapter Review The skeletal system includes all of the bones, cartilages, and ligaments of the body. It serves to support the body, protect the brain and other internal organs, and provides a rigid structure upon which muscles can pull to generate body movements. 7.1 Divisions of the Skeletal System - Anatomy and Physiology The cranium (skull) is the skeletal structure of the head that supports the face and protects the brain. It is subdivided into the facial bones and the brain case, or cranial vault (). The facial bones underlie the facial structures, form the nasal cavity, enclose the eyeballs, and support the teeth of the upper and lower jaws. 7.2 The Skull - Anatomy and Physiology In this section you will find POWER notes and regular notes for Human Anatomy and Physiology. We typically move by the chapter. For instance during the first few weeks of school, we will be on Chapter 1. We will skip chapter 2

and move to chapter 3 and so on. Even though we skip chapter [...] Human Anatomy and Physiology Notes - Mr. Uchime's Science Anatomy & Physiology I Home Page Anatomy & Physiology I. Note Summaries.
