As the first book to  
share the necessary  
algorithms for creating  
code to experiment  
with design problems  
in the processing  
language, this book  
offers a series of  
generic procedures  
that can function as  
building blocks and  
encourages you to  
then use those building  
blocks to experiment,  
explore, and channel  
your thoughts, ideas,  
and principles into  
potential solutions. The  
book covers such  
topics as structured  
shapes, solid  
geometry, networking  
and databases,  
physical computing,

image processing,  
graphic user interfaces,  
and more.

Optimal nutrition is  
important during  
pregnancy and  
lactation for the health  
of both the mother and  
infant. Chronic  
deficiencies of both  
macronutrients and  
micronutrients are well  
established in  
developing countries.  
Although in developed  
countries  
overconsumption of  
macronutrients is a  
major issue,  
micronutrient  
deficiencies which  
occur concomitantly  
are no less of a  
concern. Furthermore  
in developed countries  
there is also the risk of  
excessive  
micronutrient intake  
from dietary

supplements. Micronutrients have a role in fetal and neonatal health and also health in later life. Micronutrient deficiency or toxicity during pregnancy or early life can permanently affect developing tissues, resulting in adverse growth and development of the infant which is associated with chronic diseases in adulthood. An aberrant micronutrient intake during pregnancy or lactation can also have detrimental effect on the mother both in the neonatal period and in later life.

 Educating Believers: Religion and School Choice offers theoretical essays and empirical studies from

leading researchers on religion and schooling. Religious authority and emphasis on fairness and caring provide consistent rules governing the stable family and community relationships needed for individual growth and collective action. Religion is among the most important aspects of human life, likely hard-wired into human beings, and intimately intertwined with schooling. The book addresses key matters regarding religious pluralism in education, including the history of state-faith relationships in schooling, how religious faith can motivate teachers, whether religious education teaches tolerance, and whether practices in Europe and Asia hold lessons for

American schools. The works in this volume can guide future scholarship on religious pluralism in education, particularly work related to civic values, character formation and public policy. The chapters in this book were originally published in the Journal of School Choice.

Paulo Freire's work is always animated by a strong and fundamental affirmative spirit which calls on people to join together to make change, as opposed to simply waiting around for it to happen. This text on his contemporary importance includes essays by established and new thinkers in the Critical Pedagogy perspective.

Il Mondo Routledge

This book constitutes the refereed proceedings of the 7th International Conference on Artificial Immune Systems, ICARIS 2008, held in Phuket, Thailand, in August 2008. The 40 revised full papers presented were carefully reviewed and selected from 67 submissions. The papers are organized in topical sections on computational immunology, applied AIS, and theoretical AIS. Position papers and conceptual papers are also included.

The aim of this book is to bring together multidisciplinary research in the field of

green infrastructure design, construction and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature-based solutions and sustainable urban development. The green infrastructure and its ecosystem services, indeed, are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man-made environment like cities from heterotrophic to autotrophic

ecosystems. From landscape ecology to urban and building design, like bricks of a wall, from the small scale to the bigger landscape scale via ecological networks and corridors, we should start answering these questions: what are the services that are we offering to Nature? What are we improving? How to implement our actions? This book contains three Open Access chapters, which are licensed under the terms of the Creative Commons Attribution 4.0 International License (CC BY 4.0).

The book addresses the topic of EU legitimacy by exploring the forms, origins and effects of citizens' support to EU institutions. Through examining the wide-

ranging levels of support, the authors show how these multi-faceted attitudes cast shade on the outdated, somewhat one-dimensional concept of Euroscepticism. Di Mauro and Memoli not only observe how political issues and the economic crisis affect public opinion, but also demonstrate how national contexts play a crucial role in shaping attitudes towards Europe at any level of support. This volume shows how the lack of accountability in the EU system makes it increasingly vulnerable to the negative effects of economic and societal shocks, and the 'national lens' that we view the EU through influences our voting choices.

Maurizio Gotti analyses the various features of specialized discourse in order to assess its degree of specificity and diversification, as compared to general language. Prior to any analysis of such traits, the notion of specialized discourse and its distinctive properties are clarified.

This publication capitalizes on the experience of scientists from the North Africa and Near East countries, in

collaboration with experts from around the world, specialized in the different aspects of greenhouse crop production. It provides a comprehensive description and assessment of the greenhouse production practices in use in Mediterranean climate areas that have helped diversify vegetable production and increase productivity. The publication is also meant to be used as a reference and tool for trainers and growers as well as other actors in the greenhouse vegetables value chain in this region.

Clothing was an essential part of material culture in ancient societies both as a form of body

protection and as house equipment. Besides a practical function, textiles played a crucial role in communicating various aspects of social and personal identity. Based largely on the analysis of textile tools, this book is intended to be the first systematic attempt at reconstructing textile culture in ancient Sicily. Textile implements represent the most abundant category of evidence for textile activity in Sicily and in this book they are used as a means to explore the social dynamics within cultural interactions in the final Bronze-Iron Age and Archaic Sicily. The book begins with an overview of the cultural complexity of communities in Sicily and the Aeolian

islands, focusing on two crucial periods of Sicilian history, which are characterised by intense movements of peoples from the Italian peninsula and the establishment of Greek and Phoenician settlements. Through the investigation of textile tools, the book discusses several key aspects, including technological features of textile technology and production, knowledge transfer, networks of weavers, as well as the social significance of textile activity. By employing an interdisciplinary perspective, this book is important not only for textile specialists but also for scholars and students dealing with culturally hybrid frameworks of ancient Sicily and provides a springboard for future

studies on textile culture and cultural interactions in the ancient world.

 In questo manuale gli Arcani maggiori dei Tarocchi diventano uno strumento da usare nella vita personale, sul lavoro, per la formazione in azienda e per il coaching, superando il tradizionale utilizzo divinatorio. Come attingere alle nostre risorse nascoste per orientarci in situazioni complesse? Nei momenti di stasi, di dubbio, quando vogliamo comprendere meglio dove siamo e dove vogliamo andare, le risposte sono più semplici da trovare, se ci poniamo le domande giuste. Gli Arcani sono proposti come mezzo di introspezione, che accresce la

consapevolezza e aiuta ad assumere la giusta prospettiva nelle fasi di incertezza. La descrizione degli esercizi e dei giochi spiega come avvalersi dei Tarocchi in azienda, per la formazione, per il coaching e persino nel marketing, oltre che per l'uso personale. Le autrici ci guidano in un innovativo e originale utilizzo del simbolismo delle carte, illustrandoci come un antico gioco può diventare un supporto per gestire la transizione.

*Comparative Private Law* Springer Nature Economics and the Business Environment is directed at students who will be taking up managerial positions in trade and industry or in government. The economic environment

of European companies is central to the book giving students a good impression of recent developments within the European economy. The theories described enable students to: calculate how much competition firms within a particular business sector are exposed to analyze the current economic position of a particular country and make exchange rate prognoses gauge the effect of the economic environment on business sales and profits. Complicated analyses and mathematical models have been avoided as much as possible. Instead, diagrams and graphs illustrate the causal relationships between economic factors, making this book an ideal primer

for those needing the basics of economics for their business degree.

Il volume XLVII (2020)

è suddiviso, come di consueto, in tre sezioni più quella di recensioni/segnalazioni . La sezione saggi contiene una serie di contributi che vanno da una riflessione sul ruolo dell’archeologia medievale nelle riviste di divulgazione scientifica alla ricostruzione di un importante contesto funerario della prima età carolingia, da una valutazione critica della presenza delle monete nei depositi archeologici all’interno

di chiese, alla ricostruzione dell'attività tessile della Roma medievale o all'uso dell'arceobotanica per ricostruire la biografia di specie vegetali domestiche. Completano il volume la serie degli articoli nella sezione "Notizie scavi e lavori sul campo", che illustrano attività di ricerca in Italia (Emilia-Romagna, Sardegna e Sicilia) e all'estero (Spagna e Portogallo) e la sezione "Note e discussioni", con contributi che spaziano dall'archeologia pubblica e dalla bioarcheologia all'analisi di specifiche categorie di prodotti (le ceramiche invetriate in monocottura o l'invetriata islamica in Sicilia, le fibbie da cintura altomedievali),

dallo studio archeologico di singoli contesti (chiese, palazzi) fino all'archeologia alpina. Conclude il volume la sezione Recensioni e segnalazioni. *Economics and the Business Environment* Routledge Originally published in 1987, this collection of essays is a major contribution toward developing a realistic picture of the Latin American Jewish communities in the late 20th Century. The book will be of interest to students of comparative studies, Jewish studies and Latin American studies and responds to the need to learn more about the Jewish communities of Latin America, both as a fragment of the Jewish diaspora and as an

element in the economic and social life of the continent. *Educating Believers* Maggioli Editore Looking beyond the border of one's own legal system is to embark on a journey with the promise of gaining knowledge of foreign legal systems, as well as a fresh perspective one's home system. This book guides students, academics, and lawyers on this journey, and shows that ideas developed elsewhere can be a treasure trove of inspiration for national courts, legislators, and legal practitioners. A particular concern for the book is to include non-Western countries in this endeavor. The first part of the book looks at the origins, purposes, and methods

of comparative law, and it discusses the process of transplanting and receiving legal concepts, along with the potential pitfalls involved, using examples stretching from the reception of Roman law in Europe to the comparatively new phenomenon of European private law. The second part considers select legal systems, starting with the two most influential legal traditions, the civil law and the common law. The book examines their historical background and impact, the main sources of law, the predominant methods of dispute resolution, and the players shaping them. Then, it moves on to the legal systems in East Asia

that are playing an increasingly important role in today's world, namely China, Japan, and South Korea. The book also takes a close look at those legal systems shaped by a major world religion, in particular Saudi Arabia, the United Arab Emirates, and Israel. It closes with an Annex on how to write a thesis using the comparative law method. [Subject: Comparative Law, Private Law]

Twelve detailed essays were assembled by editor Sarah Armstrong, to help students obtain a balanced understanding of corporate corruption. Students will read whether global efforts against corruption are working, whether corporate profiteering is a source of environmental violence, and whether corporate rights work against the individual's rights.
