A practical and delicious field guide to cooking and healing with adaptogens from wellness expert and former chef Amanda Chantal Bacon, founder of Moon Juice and author of *The Moon Juice Cookbook*. In *The Moon Juice Manual*, Amanda Chantal Bacon lays out the blueprint for the next level of mind-body health. This is the quintessential guide to adaptogens, the stress-busting super-herbs and -mushrooms that Bacon introduced to the wellness world with her cult-followed Moon Dust collection. As the name suggests, adaptogens are plants that can help us adapt to and protect ourselves from the daily stress of modern life. From cordyceps (a mushroom to elevate energy and libido) to ashwagandha (a shrub to tame anxiety and reduce inflammation), adaptogens are a powerful, edible antidote to today's stressed-out, high-speed world. A plant-fueled survival guide to modern life, *The Moon Juice Manual* explains the way chronic stress impacts the mind and body and provides simple and delicious ways to incorporate adaptogens into daily life. The book offers prescriptive recommendations and functional recipes for optimizing beauty, brain, spirit, sex, sleep, or mood. Readers will understand how to make grain-free and practical recipes with adaptogens along with easy, decadent treats like Horny Goat Weed Brownies and Schisandra Sleeping Beauty Balls. *The Moon Juice Manual* makes cooking and healing with adaptogens fun, approachable, and truly transformative.

Extinct worlds live again in palaeoart: artworks of fossil animals, plants and environments carefully reconstructed from palaeontological and geological data. Such artworks are widespread in popular culture, appearing in documentaries, museums, books and magazines, and inspiring depictions of dinosaurs and other prehistoric animals in cinema. This book outlines how fossil animals and environments can be reconstructed from their fossils, explaining how palaeoartists overcome gaps in fossil data and predict 'soft-tissue' anatomies no longer present around fossil bones. It goes on to show how science and art can meet to produce compelling, interesting takes on ancient worlds, and it explores the goals and limitations of this popular but rarely discussed art genre. Multiple chapters with dozens of illustrations of fossil animal reconstruction, with specific guidance on fossil amphibians, mammals and their fossil relatives, and a myriad of fossil reptiles (including dinosaurs). Explores how best to present diverse fossil animal forms in art - how best to convey size, proportion and motion in landscapes without familiar reference points. Explains essential techniques for the aspiring palaeoartists, from understanding geological time and evolutionary relationships to rebuilding skeletons and muscles. Suggests where and how to gather reliable sources of data for palaeoartworks. Includes a history of palaeoart, outlining the full evolution of the medium from ancient times to the modern day. Examines stylistic variation in palaeoart. Showcases diverse artworks from world-leading contemporary palaeoartists. Palaeoartistry is a popular but rarely discussed art genre. This new book outlines how fossil animals and environments can be reconstructed from their fossils. Of great interest to everyone interested in palaeoartistry, dinosaurs, natural history and fossils. Superbly illustrated with 195 colour images. Dr Mark P Witton is an author, palaeontological artist and researcher whose palaeoartworks have featured in numerous research papers, television shows, museums and art galleries.

A NEW YORK TIMES NOTABLE BOOK • Ghana, eighteenth century: two half sisters are born into different villages, each unaware of the other. One will marry an Englishman and lead a life of comfort in the palatial rooms of the Cape Coast Castle. The other will be captured in a raid on her village, imprisoned in the very same castle, and sold into slavery. One of Oprah's Best Books of the Year and a PEN/Hemingway award winner, *Homegoing* follows the parallel paths of these sisters and their descendants through eight generations: from the Gold Coast to the plantations of Mississippi, from the American Civil War to Jazz Age Harlem. Yaa Gyasi's extraordinary novel illuminates slavery's troubled legacy both for those who were taken and

those who stayed—and shows how the memory of captivity has been inscribed on the soul of our nation.

Mike McGuire has been spear fishing all his life and has shared his experience with us to create a manual of great use to people who are taking up this sport, but also to people like me who have never speared a fish, but are passionately interested in diving and in fish. This book emphasizes safety, and I would urge any prospective spear fisher to read and carefully follow Mike's advice on safety. Mike covers fitness in great detail, including useful exercises to improve your fitness. He also gives his ideas about equipment. As Mike says, spear fishing has been done for thousands of years. At first this would have been a way of getting food, but as with many human activities it has developed into a sport. The book caused me to consider who the first spear fishers were. Although I referred to spear fishing as a human activity, the first spear fishers were almost certainly not human. Bonobos, a type of ape, will catch fish with their hands and have been observed to make and use very primitive spears. The first spear fishers were almost certainly an earlier near human creature." - Steve Challis (Australia)

In the face of apocalyptic climate change, a former fisherman shares a bold and hopeful new vision for saving the planet: farming the ocean. Here Bren Smith--a restorative ocean farmer--introduces the world of sea-based agriculture, a groundbreaking solution to the global climate crisis. The ocean is a vast, untapped opportunity, home to thousands of edible plants. Using simple DIY techniques, we can grow more than enough delicious and nutritious food--without the use of fresh water or fertilizers--to feed the planet and mitigate climate change, to boot. A groundbreaking "climate memoir," *Eat Like a Fish* interweaves Smith's own life--from sailing the high seas aboard commercial fishing trawlers to pioneering new forms of ocean farming to surfing the frontiers of the food movement--with actionable food policy and practical advice on ocean farming. Written with the humor and swagger of a fisherman telling a late-night tale, it is a powerful story of environmental renewal, and a must-read guide to saving our oceans, feeding the world, and--by creating new jobs up and down the coasts--putting working class Americans back to work.
