Each practice unit has 3 sets of practice questions, and each set contains 3 different levels of questions such as Section A for basic concept level, Section B for mastery level and Section C for higher-thinking level. Teachers and students can select the level to practice based on the learner's progress and comprehension. At the end, the book contains 3 Test Practices. Each test practice has 3 sections, and each section has 24 questions. Section 1 is calculator-free and students shall not use a calculator to answer the questions. Some standardized tests do not allow students to use a calculator in certain test sections. Students should also practice with time restriction to simulate the timed standardized test.
