FACILITY SITING AND LAYOUT This article was adapted from the paper, "The Facility Siting Cycle (Revalidation)," which was presented at AIChE's 13th Global Congress on Process Safety (GCPS) in San Antonio, Texas, in March 2017. Facility siting is an assessment of occupied buildings given potential exposure to explosion, fire and toxic hazards. What You Need to Know About Facility Siting and Revalidation Regarding facility siting, CPL 03-00-021 requires that "during the initial walkaround [inspectors] should observe potential hazards including, but not limited to, pipe work at risk of impact, corroded or leaking equipment, unit or control room siting and trailer location, and relief devices and vents that discharge to atmosphere." Top 12 Issues for Facility Siting Studies: What Does OSHA ... IFO Group consultants can quickly and efficiently help you comply with regulatory and industry codes and guidelines pertaining to facility siting studies or provide you with an assessment of a new project. Regulatory and Compliant Facility Siting Studies and ... The new second edition of CCPS's Guidelines for Siting and Layout of Facilities has been written to

address the many developments in the last decade which have improved how companies survey and select new sites, evaluate acquisitions, or expand their existing facilities.
