On the Hybrid Nature of the Book in the Age of Electronic Publishing CRC Press

For many centuries Jews and Germans were economically and culturally of significant importance in Eastern Europe. Both groups had a similar background of origin and spoke related languages: German and Yiddish. This volume aims to explore the entanglements and interdependences of Jews and Germans in Eastern Europe from the late middle ages to the 20th century. Moreover, the perception of Jews as Germans in this region is discussed in detail.

The Problems Book helps students appreciate the ways in which experiments and simple calculations can lead to an understanding of how cells work by introducing the experimental foundation of cell and molecular biology. Each chapter reviews key terms, tests for understanding basic concepts, and poses research-based problems. The Problems Book has been

Roughly half of all project managers have to lead customer projects as profit centers on contractor side with two big objectives: making the customer happy and bringing money home. Customer projects are a high-risk business on both sides, customers and contractors, but the dynamics of this business have so far been mostly ignored in literature. The book is intended to fill this gap. The book helps project managers better understand the dynamics of customer projects under contract from business development through handover and find solutions for common problems. A central aspect is international contract laws, an often underestimated factor in projects.

Pop literature of the 1990s enjoyed bestselling success, as well as an extensive and sometimes bluntly derogatory reception in the press. Since then, less censorious scholarship on pop has emerged to challenge its flash-in-the-pan status by situating the genre within a longer history of aesthetic practices. This volume draws on recent work and its attempts to define the genre, locate historical antecedents and assess pop's ability to challenge the status quo. Significantly, it questions the 'official story' of pop literature by looking beyond Ralf Dieter Brinkmann's works as origin to those of Jürgen Ploog, Jörg Fauser and Hadayatullah Hübsch. It also remedies the lack of attention to questions of gender in previous pop lit scholarship and demonstrates how the genre has evolved in the new millennium via expanded thematic concerns and new aesthetic approaches. Essays in the volume examine the writing of well-known, established pop authors – such as Christian Kracht, Andreas Neumeister, Joachim Lottman, Benjamin Lebert, Florian Illies, Feridun Zaimoğlu and Sven Regener – as well as more recent works by Jana Hensel, Charlotte Roche, Kerstin Grether, Helene Hegemann and songwriter/poet Peter Licht.

This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search,

augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Any reader of scholarship on the ancient and early medieval world will be familiar with the term 'Germanic', which is frequently used as a linguistic category, ethnonym, or descriptive identifier for a range of forms of cultural and literary material. But is the term meaningful, useful, or legitimate? The term, frequently applied to peoples, languages, and material culture found in non-Roman north-western and central Europe in classical antiquity, and to these phenomena in the western Roman Empire's successor states, is often treated as a legitimate, all-encompassing name for the culture of these regions. Its usage is sometimes intended to suggest a shared social identity or ethnic affinity among those who produce these phenomena. Yet, despite decades of critical commentary that have highlighted substantial problems, its dominance of scholarship appears not to have been challenged. This edited volume, which offers contributions ranging from literary and linguistic studies to archaeology, and which span from the first to the sixteenth centuries AD, examines why the term remains so pervasive despite its problems, offering a range of alternative interpretative perspectives on the late and post-Roman worlds.

Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like English, Afrikaans, and the Scandinavian languages. It takes its inspiration from the idea of a "Germanic Sandwich", i.e. the hypothesis that sets of genetically related languages diverge in systematic ways in diverse domains of the linguistic system. Its contributions set out to test this approach against new phenomena or data from synchronic, diachronic and, for the first time in a Sandwich-related volume, psycholinguistic perspectives. With topics ranging from nickname formation to the IPP (aka 'Ersatzinfinitiv'), from the grammaticalisation of the definite article to /s/-retraction, and from the role of verb-second order in the acquisition of L2 English to the psycholinguistics of gender, the volume appeals to students and specialists in modern and historical linguistics, psycholinguistics, translation studies, language pedagogy and cognitive science, providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions.

This open access book looks at how a democracy can devolve into a post-factual state. The media is being flooded by populist narratives, fake news, conspiracy theories and make-believe. Misinformation is turning into a challenge for all of us, whether politicians, journalists, or citizens. In the age of information, attention is a prime asset and may be converted into money, power, and influence - sometimes at the cost of facts. The point is to obtain exposure on the air and in print media, and to generate traffic on social media platforms. With information in

abundance and attention scarce, the competition is ever fiercer with truth all too often becoming the first victim. Reality Lost: Markets of Attention, Misinformation and Manipulation is an analysis by philosophers Vincent F. Hendricks and Mads Vestergaard of the nuts and bolts of the information market, the attention economy and media eco-system which may pave way to postfactual democracy. Here misleading narratives become the basis for political opinion formation, debate, and legislation. To curb this development and the threat it poses to democratic deliberation, political self-determination and freedom, it is necessary that we first grasp the mechanisms and structural conditions that cause it.

bookdown: Authoring Books and Technical Documents with R
 Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.
