Schaum's Easy Outline of Principles of Economics OUP USA

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics

Managerial Economics in a Global Economy Cambridge University Press

This volume addresses highly topical issues at a crucial time in international economic relations. The world has never been closer to dismantling the liberal multilateral trading system which has been painstakingly established and successfully operated since the Second World War. In this volume many of the world's most distinguished economists examine the movement toward protectionism, bilateralism, and regionalism, and its causes, effects, and possible solutions. The contributors are theorists, researchers, and advisors to governments and international organizations who are at the forefront of trade theory, policy, and practice, and whose analyses have a real impact on international trade. By collecting together these analyses in a single volume, this book provides a unique survey for students and scholars of economics, and all those concerned with trade theory and policy in business and government.
