Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth-century Japanese master Dogen, founder of the Soto school. This study examines the historical and religious character of the practice as it is

described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization. The Soto version of Zen meditation is known as "just sitting," a practice in which, through the cultivation of the subtle state of "nonthinking," the meditator is said to be brought into perfect accord with the higher consciousness of the "Buddha mind" inherent in all beings. This study examines the historical and religious character of the practice as it is described in Dogen's own

meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.

 The Coast Guard knows how to navigate (even if the Navy doesn't!). This official guide to Coast Guard navigation procedures is an excellent resource for anyone who is responsible for safe navigation at sea. As the Manual observes: Navigation is a critical and fundamental competency for all underway operations. This Manual assists CO/OICs and Navigators in carrying out their responsibilities outlined in Reference (a), and complements References (b) through (l). It also provides uniform standards and guidance to ensure the navigational accuracy and safety of Coast Guard cutters, boats, and their crews during operations. This Manual leverages the capabilities provided by electronic navigation systems found on cutters, cutter boats, and boats while retaining the capability to conduct traditional forms of navigation if, and when, electronic means of navigation are not available. Analysis of operational mishaps and studies have shown that risks associated with navigation can be systematically controlled by: (1) Strong knowledge and

skills in navigation fundamentals, doctrine, and techniques. (2) Preventing accumulation of errors in the flow of information. (3) Verifying vessel position using all available means. (4) Strong knowledge regarding the structure, capabilities, and limitations of electronic charting and Global Positioning System (GPS) data. (5) Compliance with established navigational procedures. "Volk's impressive study rethinks the East-West binary often reiterated in discussions of Japanese modernism by reinserting local aspects into the universalizing tendencies of modernism itself. The book makes an important contribution to the growing literature on modern Japanese art history by providing an alternative comparative framework for understanding the global development of modernism that decenters Euro-America. Rigorously historical in her critique, Volk destabilizes our understanding of the Japanese experience of modernity through the prism of Yorozu's singular vision of the self, leaving us questioning conventional wisdom and contented to wobble."--

Gennifer Weisenfeld, Duke University "In Volk's affectingly stunning and deeply reflective study of the Japanese artist Yorozu Tetsugorō's work between 1910-1930, we have a profoundly historical reminder of how modernism everywhere struggled to meet the demands of the new with the readymades of received artistic practices. In this study of Yorozu's utopian universalist project, Volk has imaginatively broadened our understanding of the modernist moment and perceptively captured its global program to unify art and life, contemporary culture and history."--Harry Harootunian, author of *Overcome by Modernity: History, Culture and Community in Interwar Japan*

In this "suspenseful...captivating" (Publishers Weekly) novel in GhostWalker series, #1 New York Times bestselling author Christine Feehan tracks the desperate steps of a wanted

woman—betrayed, avenging, and dangerously irresistible... Gator Fontenot of the Special Forces paranormal squad can't refuse an urgent request to save the elusive Iris "Flame" Johnson, a victim of the same horrific experiments that warped Gator. Now unleashed, she's a red-haired weapon of unimaginable destructive powers, a walking time bomb bent on revenge in the sultry bayous of New Orleans, and hunted by a shadowy assassin. It's Gator's job to reel Flame in. But can two people haunted by violent betrayals trust the passion that soon ignites between them? Or is one of them just playing another seductive and deadly night game?

The role of translation in the formation of modern Japanese identities has become one of the most exciting new fields of inquiry in Japanese studies. This book marks the first attempt to establish the contours of this new field, bringing together seminal works of Japanese scholarship and criticism with cutting-edge English-language scholarship. Collectively, the contributors to this book address two critical questions: 1) how does the conception of modern Japan as a culture of translation affect our understanding of

Japanese modernity and its relation to the East/West divide? and 2) how does the example of a distinctly East Asian tradition of translation affect our understanding of translation itself? The chapter engage a wide array of disciplines, perspectives, and topics from politics to culture, the written language to visual culture, scientific discourse to children's literature and the Japanese conception of a national literature. Translation in Modern Japan will be of huge interest to a diverse readership in both Japanese studies and translation studies as well as students and scholars of the theory and practice of Japanese literary translation, traditional and modern Japanese history and culture, and Japanese women's studies.

The Art of War is an enduring classic that holds a special place in the culture and history of East Asia. An ancient Chinese text on the philosophy and politics of warfare and military strategy, the treatise was written in 6th century B.C. by a warrior-philosopher now famous all over the world as Sun Tzu. Sun Tzu's teachings remain as relevant to leaders and strategists today as they were to rulers and military generals in ancient times. Divided into thirteen chapters and written succinctly, The Art of War is a must-read for anybody who works in a competitive environment.

This book is essential for audio power amplifier designers and engineers for one simple reason...it enables you as a professional to develop reliable, high-performance circuits. The Author Douglas Self covers the major issues of distortion and linearity, power supplies, overload,

DC-protection and reactive loading. He also tackles unusual forms of compensation and distortion produced by capacitors and fuses. This completely updated fifth edition includes four NEW chapters including one on The XD Principle, invented by the author, and used by Cambridge Audio. Crosstalk, power amplifier input systems, and microcontrollers in amplifiers are also now discussed in this fifth edition, making this book a must-have for audio power amplifier professionals and audiophiles.

The Art of War

Four case studies give evidence of what constituted modes of collaboration among artistic producers in the period. In each case Davis explores a different configuration of collaboration: that between a teacher and a student, two painters and their publishers, a designer and a publisher, and a writer and an illustrator. Each investigates a mode of partnership through a single work: a specially commissioned print, a lavishly illustrated album, a printed handscroll, and an inexpensive illustrated novel. These case studies explore the diversity of printed things in the period ranging from expensive works made for a select circle of connoisseurs to those meant to be sold at a modest price to a large audience.
