This Understanding treatise is designed for first-year law students enrolled in Contracts. The text explains common law principles of contract law using cases and examples that students commonly encounter in this first-year course. It draws illustrations from the Restatement (Second) of Contracts, and from Article 2 of the Uniform Commercial Code as it has been adopted in all fifty states. This edition includes expanded material on the United Nations Convention on the International Sale of Goods, and the UNIDROIT Principles of International Commercial Contracts, appropriate to a basic course in Contracts, and on modern statutes regarding electronic

contracting. Understanding Contracts was written with the understanding that Contracts will be one of the most challenging courses first-year law students will take. It explains how key concepts apply in several recurring basic fact patterns. It then builds on those fact patterns to explain how the law is more difficult to apply in business transactions with more complex facts. A key feature of Understanding Contracts, that is not found in other similar books, is its conscious incorporation of basic explanations of the common business practices to which the law of contracts applies. The feature helps students, many of whom have not had any background in the business world, understand contract law in the business settings in which it frequently applies.

The book also provides detailed topic headings that students can use to develop their own comprehensive course outline.

Understanding Contracts Bentley Publishers

Unbeatable BMW is the comprehensive history of BMW competition from 1917 through 1997. The first edition of Unbeatable BMW became a cult classic among enthusiasts, but its coverage was restricted to the years 1959-79. Now, this astounding story has been massively expanded by the author in a hardcover format, richly illustrated in full color. Jeremy Walton weaves together the tale of BMW's engineering know-how, daredevil drivers, inimitable team leaders, and the cars they championed and drove to the winner's circle. Behind BMW's envied reputation and the whirling-propeller badge are such

legends as the prewar BMW 328 sports cars and the 1990s 200 m.p.h. McLaren/BMW V12s. Unbeatable BMW also gives first-hand tales of BMW's aviation and motorcycling deeds. Included are gripping accounts of the preparation and track-side action for such emotive winners as the diminutive BMW 700 coupes to the 1800 "Tisa" and 2002s. Walton sweeps through the 1970s "Batmobile" 3.0 CSL lightweight racing coupes, then explores the best-selling 3-series in every race category. Walton also covers the unexpected success of the 5- and 6-series, the latter against Jaguar. Unbeatable BMW recalls the establishment of BMW's Motorsport division, and the thrill of the first M-Powered cars. From M1 onward, the author details the burgeoning M-brand,

how MPower won the first world title for a turbocharged car (1983), and the years as the backbone of European Formula 2. The book's 582 pages are packed with detail to thrill the heart of the most ardent BMW fan, from meticulous photo captions listing car, driver, and race date, to six appendices covering the competition cars since 1960, drivers' accomplishments, and powerplant specifications. In short, if BMW has raced, rallied, or flown their products in competition, Unbeatable BMW gives the full, behind-the-scenes story in this compelling account of the marque's motorsports history.

"Teaching small business management courses is exciting, but it can also be quite challenging. Some students take courses in small business management because they want to start and run their own firm someday. For other students, the idea of having their own business is appealing, even though they know they prefer to have a regular job after they graduate. Yet other students may find themselves in a small business management course when looking for an interesting elective to take. Most college students have very little experience actually managing a business. Some students, however, have grown up in a small business where they saw one or both parents (and sometimes,

grandparents) work hard in the business. In other words, there are few similarities in how much students know and care about small firms. My goal in writing this text is to encourage student learning and engagement with small business, regardless of differences in students' motivations and reasons for signing up for this course"--
