Our group research focuses on Mechanics and Physics of Soft Materials. Our current projects include active materials, instabilities, 3D-printing; bioinspired materials; acoustic metamaterials and wave propagation in soft matter, in general; new actuation mechanisms for soft robotics, failure mechanisms in composite materials. Please read our research page for more details.
Soft Matter Laboratory - UW-Madison
The project aims to synthesize and study a new class of soft matter systems, namely, self-assembled, living and interpenetrating polymer networks.

main forms: solids, liquids, and gases. Solids are materials that have a defined shape and volume that stays the same. Rocks are a good example of a solid – they have a rigid shape that isn't easily changed. Liquids are a type of matter that changes shape depending on the shape of its container.
