la.comThe Columbia-class submarine, formerly known as the Ohio Replacement Submarine and SSBN-X Future Follow-on Submarine, is an upcoming class of nuclear submarines designed to replace the Ohio-class ballistic missile submarines in the United States Navy. The first submarine is scheduled to begin construction in 2021 and enter service

in 2031. Columbia-class submarine - WikipediaThe submarine, never built, would have been smaller than other subs and a mothership to drones. The design—let’s call it “Sub 2000”—was much flatter and organic in appearance. The sail was much shorter and blended into the length of the hull, which had a flattened bottom. Unlike the current t-shaped tail fins of U.S. Navy subs, Sub 2000 had

an “x” shape not unlike Japan’s Soryu-class diesel electric attack submarines. Here is the Advanced Attack Submarine the U.S. Navy Never ...Concepts of hydrodynamic s, structure, powering and dynamics are explained, in addition to architectural considerations which bear on the submarine design process.
