In the Skin of a Lion Tata McGraw-Hill Education
 The First Edition of this text was written at a time when the structures of international relations were undergoing a profound transformation, with the collapse of Soviet-style communism just behind us and the creation of NAFTA and the WTO just ahead. The Second Edition came at a time when NAFTA and the WTO had taken shape but not yet acquired a history. At the time of the Third Edition, both of those structures can be studied in detail and their ramifications for the world economy can be better appreciated. In the interim, the Internet has established itself as a presence in innumerable firms and households, and the dot com bubble has come and gone. The services-oriented information economy seems no longer to be emerging, but rather a fundamental aspect of contemporary business. The Fourth Edition of *International Business and Economics* reflects the growth and development of the global economy as well as the way law schools prepare lawyers to work in that world. The book

was written in the shadow of a financial crisis that seemed at times destined to bring international economic catastrophe, but which so far has been grim but not disastrous. The book has been revised more comprehensively than any of the earlier successor editions. For example, materials on international civil litigation have largely dropped out and correspondingly more materials on international investment arbitration and WTO dispute resolution, as well as the interaction between those bodies of law and national law have been added. This eBook features links to Lexis Advance for further legal research options.

 China and the ASEAN region have risen rapidly to a position of immense economic significance in the global economy. Academics, policy makers and businesses are all keen to understand more about taxation in China and ASEAN, and this work seeks to address this key issue by providing a comprehensive overview of the many often mentioned but little understood challenges of doing business in the region. Traversing a wide range of regional issues and jurisdictions, topics covered include the role of DTAs in regional integration, the impact of social institutions on tax, corruption and its causes, economic

development and taxation and the use of education in developing systems. Case studies are taken from countries such as China, Vietnam, Hong Kong, Singapore, the Philippines, Malaysia and Indonesia. Drawing on the results of these discussions, the book also sheds light on the question of whether different taxing institutions are needed in the region. Gathering together a cross-disciplinary group of eminent scholars, this work will be of great interest to all students and scholars of Asian economics, Asian finance and taxation in general.
