My Start-Up Life Penguin
 A Simple Mindset Tweak Will Change Your Life. After a fifteen-year nightmare operating a stagnant service business, Sam Carpenter developed a down-to-earth methodology that knocked his routine eighty-hour workweek down to a single hour—while multiplying his bottom-line income more than twenty-fold. In *Work the System*, Carpenter reveals a profound insight and the exact uncomplicated, mechanical steps he took to turn his business and life around without turning it upside down. Once you “get” this new vision, success and serenity will come quickly. You will learn to:

- Make a simple perception adjustment that will change your life forever.
- See your world as a logical collection of linear systems that you can control.
- Manage the systems that produce results in your business and your life.
- Stop fire-killing. Become a fire-control specialist!
- Maximize profit, create client loyalty, and develop enthusiastic employees who respect you.
- Identify insidious “errors of omission.”
- Maximize your biological and mechanical “prime time” so that you are working at optimum efficiency.
- Design the life you want—and then, in the real world, quickly create it! You can keep doing what you have always done, and continue getting mediocre, unsatisfactory results. Or you can find the peace and freedom you’ve always wanted by transforming your business or corporate department into a finely tuned machine that runs on

The Good, the Bad, and the Complicated...Life Behind the O.R. Doors Macmillan

** ACCORDING TO BUSINESS INSIDER: "Getting your MBA has never been easier. Haroun is one of the highest rated professors on Udemy, so you can expect to be in good hands through the course of your education." ** This is the book version of the popular Udemy.com course called "An Entire MBA in 1 Course." From the Author of "101 Crucial Lessons They Don't Teach You in Business School," which Forbes magazine calls "1 of 6 books that all entrepreneurs need to read right now." This book will teach you everything you need to know about business....from

starting a company to taking it public. Most business books are significantly outdated. This book leverages many online resources and makes the general business, accounting and finance process very easy to understand (and enjoyable too)! There are many incredibly engaging and entertaining video links in the book to YouTube and other sources; 'edutainment' works! Although this book is close to 400 pages, I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently, based on my experience at a prominent San Francisco based venture capital firm. I also included many helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a "greatest hits" business summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. As the title of this book suggests, this is an entire MBA in one book; it's also a practical manual to help you accomplish your business career goals. I have minimized "boring theoretical concepts" in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the San Francisco Bay Area, you can find other courses that I teach online at www.udemy.com/user/chris-haroun/. *Thinking, Fast and Slow... in 30 Minutes* Currency

The book focuses on identifying your own leadership strengths to get success. Leadership is never easy. But thankful, something else is also true. Everyone of us has the potential to be a leader every day. Many people still have a narrow understanding of what leadership really is. But the fact of the matter is that

leadership doesn't begin and end at the very top. It is every bit as important, perhaps more important, in the place most of us live and work. The leadership techniques that will work best for you are the ones you nurture inside. The best selling book on Human relations.

Learn an entire MBA course without spending thousands and waving goodbye to two years of your life. If you want to succeed in business then an MBA programme is the best way to build expertise, knowledge and experience. But an MBA programme at any top school is an enormous investment in time, effort and money. In *The Visual MBA*, Jason Barron offers a radical solution, explaining all key business school concepts through illustrations. When Barron started his MBA course, he decided to draw all his notes so that other people could benefit from them. And it's a good thing he did, because research shows that more than 65% of us are visual learners and that our brains process illustrations 60,000 times faster than text. From Marketing, Ethics and Accounting to Organisational Behaviour, Finance, Operations and Strategy, *The Visual MBA* distils the most important principles of an MBA into an accessible, informative and easily-digestible guide. Jason Barron is a product manager and illustrator who helps people realise their creative ideas through visual learning. He spent 516 hours in class and countless hours studying at home completing his MBA. Along the way, rather than taking notes that he would never read again, Jason created sketchnotes for each class and has turned them into an interesting and engaging resource so that you don't have to sit through another class again!

From the author of *Die Empty* and *The Accidental Creative*, a new framework for understanding what motivates us and why. What drives us to unleash our best work? And how do we tap into that drive to get superior results with our managers, coworkers, and direct reports? As Todd

Henry reveals in this illuminating book, drawing on decades of research and interviews with over 100,000 people, the answer is not one size fits all: some people are energized by a race against the clock, while others put in extra effort only when they feel part of a team. For still others, nothing is as motivating as the possibility of public recognition. Henry shows, in fact, that there are twenty-seven "motivational themes", each with its own unique DNA. For instance: · Those driven to Achieve Potential strive to build an ideal future, even when others may not see as far ahead. · Those needing to Overcome must conquer whatever obstacles come their way, no matter how difficult or time-consuming. · Those who strive to Comprehend and Express are obsessed with mastering new skills and showing off what they know--which is often a lot. · Those who want to Make It Right thrive when systems are running smoothly and usually know the "proper way" to do things. The Motivation Code teaches us to decode our Core Motivation so that we can have conversations, make decisions, and even choose career paths that lead us to experience engagement and fulfillment. Once we know how to activate our inner drivers, we can transform the work we do into work we love.

The Personal MBA Simon and Schuster
If you're going to read one book about Hollywood, this is the one. As the co-founder of Creative Artists Agency, Michael Ovitz earned a reputation for ruthless negotiation, brilliant strategy, and fierce loyalty to his clients. He reinvented the role of the agent and helped shape the careers of hundreds of A-list entertainers, directors, and writers, including Steven Spielberg, Martin Scorsese, Meryl Streep, Sean Connery, Bill Murray, Robin Williams, and David Letterman. But this personal history is much more than a fascinating account of celebrity friendships and bare-knuckled dealmaking. It's also an underdog's story: How did a middle-class kid from Encino work his way into the William Morris mailroom, and eventually become the most powerful person in Hollywood? How did an agent (even a superagent) also become a power in producing, advertising, mergers & acquisitions, and modern art? And what were the personal consequences of all those deals? After decades of near-silence in the face of controversy, Ovitz is finally telling his whole story, with remarkable candor and insight.

Business is one of the great social

equalizers for our global society. Commerce, business, supply and demand, entrepreneurs, corporations, and other business-related ideas have become second nature to most areas of the planet. Given the collective interest in and significance of business, people naturally want to become experts. They read newspapers, study the stock market, enroll in business school, and even design career paths so that they can become a business professional. Some people are of the opinion that true business insight and savvy can only come from formal academic institutions, while others argue that real world experience is the best teacher. There are positive and negative arguments for both of those lines of logic. This book is meant to bridge the gap between stuffy lecture halls and experience-building employment. The idea of encapsulating an entire MBA in a single book may seem overly bold or unrealistic, but by boiling down the concepts of business success and modern theory into a single book, it becomes far less intimidating for readers who want to push their career forward, regardless of where they are in the business hierarchy. This book contains everything from invaluable reminders for CEOs to inspiring advice for first-time, start-up entrepreneurs. Becoming a powerful and successful business professional is a never-ending journey, because you will always be learning and developing your skills, adapting them to the dynamic world of modern business. This book helps to facilitate that educational process, providing the real-world examples of business skills, knowledge components, foundational qualities, and professional tools that can push you in the right direction. If you're starting a business, running a business, or looking for a job, you probably don't have much time to enroll in business school, read a dozen dry textbooks on corporate theory, or constantly stay appraised of every new development in global commerce. While this book may not answer all your questions about how to find success, it will highlight the most important elements on the road to becoming a desirable, effective, and powerful business professional. By drawing from some of the most successful business models and business professionals in recent history, you can look at problems from new perspectives and hopefully find some inspiration from some of the greatest minds of our generation. From international titans like Walmart and Amazon to crowdsourcing sites and charitable retailers, there are lessons to be

learnt on every one of these pages, no matter what size company you work for or what ambitious plans you have for your new enterprise. The MBA Book simplifies the business process by incrementally moving from the conceptual foundation of a company to the final touches, including the skills and tools that an established company should tweak and perfect in order to remain competitive and successful.
