## **DUKE JOURNEY**

---

### **ERIC Educational Documents Index**

Allied Publishers

Senior secondary chemistry text designed to be consistent with the aims of the new Queensland senior syllabus in chemistry. Provides examples of practical

applications of theoretical scientific knowledge, graded exercises and revision questions. Includes answers to exercises and an index.

#### **Chemistry** Allied Publishers

Education, Industry and Technology is a result of a conference in Bangalore, which discusses industrial and technological issues in primary school science and other related topics. This text specifically examines building applications into

secondary science curricula and strategies for teaching science, including the use of games and simulations, work experience programs, industrial visits, and methods of promoting technology as the means for solving problems. The needs of industry and the role of tertiary institutions in development are also some of the highlights of this text. This book will be very helpful to educators and government administrators assigned to advance

education.

Home Economics and Domestic Subjects Review Waxmann Verlag

Content of yearbooks originates in the sessions of the International Conference on Education (ICE).

**Chemistry 2** Concept Publishing Company

"A subject-author-institution index which provides titles and accession numbers to the document and report literature that was announced in the monthly issues of Resources in education" (earlier called Research in education).

*Chemistry 2 Unit Stage 6 Syllabus* Hodder Education

This Practice Book supports the existing and bestselling edition of IGCSE Chemistry Student's Book. - The perfect resource to use throughout the course to ensure you learn the topics and practise the content of the Cambridge IGCSE syllabus. -

Contains a wealth of levelled questions, including Stretch and Challenge for higher ability students. - Plenty of exam-style questions and actual exam questions from past Cambridge exam papers for exam success.

**Active Chemistry** Springer

2023-24 BSST English Language Study Material & Solved Papers

Perspectives on Education and Science Teaching Allied Publishers

General study of Cuba - covers the economy, the social structure, the political system, demographic aspects and geographical aspects, living conditions, education, culture, mass medias, etc. Bibliography pp. 485 to 525, diagram, maps and statistical tables.

Chemistry Senior Syllabus Waxmann Verlag

This unique handbook offers an analytical review of the education systems of all European countries, following common analytical guidelines, and highlighting the paradox that education simultaneously pursues a universal value as well as a national character. Coverage includes international student performance studies, and a comparison of education dynamics in Eastern "new Europe" with "older" western EU members. The book provides a differentiated analytical data base, and offers suggestions for further research.

Bulletin YOUTH COMPETITION TIMES

As teachers we often tend to expect other countries to teach chemistry in much the

same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world: Teaching Chemistry around the World. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand - due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving - we have to learn from each others' educational systems.

*English Language Study Material & Solved Papers* Springer Science & Business Media  
*Study in Europe: A Scholarships Guide* - presents scholarships, awards, fellowships, grants, studentships, bursaries and courses that are available in different universities and colleges in Europe. Each

scholarship award description includes: name of University or College, academic department or faculty offering the award, degree program and duration of study, value and purpose of the scholarship, admission requirements and eligibility, any restrictions, application deadlines and notification dates for undergraduate, graduate, doctoral and post-doctoral study/research, and contact information. *Bulletin of the Unesco Regional Office for Education in Asia* Elsevier  
The spectacular economic and

technological achievements of certain Far Eastern countries have attracted world wide attention. The markets of the West are dominated by the products of countries with no traditions of industrialisation and few natural resources. The reaction to this phenomenon has been a mixture of amazement, admiration, envy and, curiosity to know how it was done. This book addresses these questions through a study of the modernisation of three of the most successful Asian societies - Japan, Singapore and Hong Kong.
