How to restore Honda SOHC Fours Causey Enterprises, LLC
As the costs associated with buying and owning collectible American and European motorcycles continue to rise, enthusiasts are turning in greater numbers to motorcycles produced by Japanese manufacturers from the 1960s to the early 1980s. The prolific production of Japanese motorcycles during this period today translates to consumer-friendly market values for collectors. This buyer's guide divides the world of classic Japanese motorcycles by the four major manufacturers -- Honda, Kawasaki, Yamaha, and Suzuki -- while emphasizing such landmark models as the Kawasaki Z-1 and Honda CB750, and

featuring a chapter of less common models from secondary marques like Bridgestone. Photographs of the motorcycles are accompanied by complete descriptions of specification, components, paint codes, and serial numbers. A five-star rating system grades the bikes on collectibility, parts availability, two-up touring, reliability, and power, while the author highlights common repair and restoration needs, and suggests sources for collectible models.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

To most thirty-something women, walking across the street to get a skinny latte and the latest copy of heat in excruciating high heels is an all-terrain task in itself. But Lois Pryce isn't just any woman - nine to five and post-work white wine spritzers have never been her thing. Unafraid of a challenge - having already ridden her motorbike from Alaska to the southernmost tip of

South America - she decided she could never be one to settle for a last minute package holiday in Viva Espana. So, she began the kind of adventure most of us could only ever dream of.
