Learn how to trade Bitcoin profitably and safely, with professional day trader and trading coach Harvey Walsh. The price of bitcoin soared more than 1,300% in 2017. Not a bad return for anyone who bought at the start of the year, but savvy traders made considerably more. By trading price movements in both directions, those in the know were able to make huge profits, and now Harvey Walsh is going to pull back the curtain and show you how you can do the same. In Bitcoin For Traders, you will learn - Exactly what Bitcoin is, and how it works. - Both conventional and unconventional ways of trading cryptocurrencies like Bitcoin. - Why Bitcoin arbitrage is harder than you think. - How to use multiple exchanges to unearth hidden trade opportunities. - A little-known virtually risk-free and zero-effort method to profit

from Bitcoin and other cryptocurrencies. - How to easily set yourself up as your own Bitcoin exchange to profit from the spread. - The hidden traps that lurk in every corner of the Bitcoin world, and how to steer well clear of them. - All the tools you need to get started, where to find the best ones (for free), and how to use them to get ahead of the other traders in the market. - How to spend your Bitcoin trading profits at the world's biggest store, and get a discount into the bargain. Bitcoin has often been referred to as the 'Wild West' of finance, and with good reason. There are more ways to lose money with Bitcoin than any other kind of trading, and no shortage of scammers and hackers eager to get their hands on your profits. So as well as showing you how to trade these exciting new markets for maximum returns, Harvey also teaches you how to stay safe. Written in his well-known chatty style, *Bitcoin For Traders* avoids unnecessary technical jargon and buzzwords, making it fun and simple to learn. Bitcoin doesn't have to be complicated. If you already trade, this book will help you make the transition in no time at all. And if you've never traded before, two detailed

appendices will get you up to speed with the basics, and present you with proven and profitable strategies you can use to begin trading today.

The real-life trades and strategies of a successful cryptocurrency trader Glen Goodman's goal was to retire young and wealthy, escaping the daily grind. He taught himself how to trade everything from shares to Bitcoin and made enough money to realise his dream and quit his day job while still in his 30s. In *The Crypto Trader*, Glen will show you exactly how he made huge profits trading Bitcoin, Ethereum, Ripple and more, so that you can do it too - without risking your shirt. Glen publicly called the top of the market in December 2017 and took his profits before the crash. But there are still tons of trading opportunities out there and Glen continues to trade crypto successfully. Inside you'll see his multi-hundred-percent gains on a raft of cryptocurrencies and learn how he builds his profits and holds onto them. Glen reveals all his trading strategies, the proven methods and rules that make him one of the most followed traders in the world on social media. (He is

also frequently interviewed by the BBC, Forbes and LBC, and is a contributing expert on cryptocurrency at the London School of Economics.) It took Glen years of study and trial and error to become a consistent money maker. He learnt his trading lessons the hard way - so you don't have to. With *The Crypto Trader* by your side, you'll learn how to grab opportunities, make money - and keep it. *Bitcoin And Cryptocurrency* Harriman House Limited

Bitcoin is a cryptocurrency and a digital payment system invented by an unknown programmer, or a group of programmers, under the name Satoshi Nakamoto. It was released as open-source software in 2009. The system is peer-to-peer, and transactions take place between users directly, without an intermediary. These transactions are verified by network nodes and recorded in a public distributed ledger called a blockchain. Since the system works without a central repository or

single administrator, bitcoin is called the first decentralized digital currency. Besides being created as a reward for mining, bitcoin can be exchanged for other currencies, products, and services in legal or black markets. As of February 2015, over 100,000 merchants and vendors accepted bitcoin as payment. According to research produced by Cambridge University in 2017, there are 2.9 to 5.8 million unique users using a cryptocurrency wallet, most of them using bitcoin.

I am publishing this book at the worst possible time. The Crypto Fear and Greed Index meter hovers over extreme fear, and yet, this is also the best time to look at the crypto market. Cryptocurrency's are going at bargain sale rates, especially those in the top ranks. However, not every cryptocurrency is worth picking up. Remote viewing offers a guide as to whether a coin is a real bargain, and those coins you are wise to avoid, and often why. Packed with background and remote viewing data, enough to give you a guide on particular aspects of each cryptocurrency to pay attention to when looking at more traditional sources of information. If you are new to remote viewing or cryptocurrency, a remote viewer, or simply looking for anything that gives your research into these coins an edge, then this book is for you. If one thing is clear from my remote viewing sessions in this series, it is this. Love it or hate it, cryptocurrency is here to stay. Book Seven covers twelve coins and tokens with a chapter for each covering the background and what my remote viewing shows the

future holds for it. The remote viewing data includes insights into the crypto projects not easy to come by using more traditional sources. I conclude each chapter with a clear statement on whether the remote viewing results show the cryptocurrency is a keeper or a non-keeper. The cryptocurrencies covered in this book are as follows: Ankr (ANKR) Dash (DASH) Decred (DCR) Fantom (FTM) GateToken (GT) Handshake (HNS) Hive (HIVE) Maker (MKR) SingularityNET (AGIX) Terra (LUNA) Unibright (UBT) Wanchain (WAN)
