**Mystical Dimensions of Islam** Univ of North Carolina Press

In making the Prophet Muhammad the greatest figure, and consequently one of the most resplendent landmarks in human history, God has bestowed his greatest favour on mankind. Whoever seeks guidance cannot fail to see him, for he stands out like a tower, a mountain on the horizon, radiating light like a beacon, beckoning all to the true path. It is inevitable that the seekers of truth will be drawn up to the magnificent pinnacle on which he stands.

**Modern English Version** Routledge

If the Qur'an is the first written formulation of Islam in general, Malik's Muwatta' is arguably the first written formulation of the Islam-in-practice that becomes Islamic law. This book considers the methods used by Malik in the Muwatta' to derive the judgements of the law from the Qur'an and is thus concerned on one level with the finer details of Qur'anic interpretation. However, since any discussion of the Qur'an in this context must also include considerations of the other main source of Islamic law, namely the sunna, or normative practice, of the Prophet, this latter concept, especially its relationship to the terms of hadith and amal (traditions and living tradition), also receives considerable attention, and in many respects, this book is more about the history and development of Islamic law than it is about the science of Qur'anic interpretation. This is the first book to question the hitherto accepted frameworks of both the classical Muslim view and the current revisionist western view on the development of Islamic law. It is also the first study in a European language to deal specifically with the early development of the Madinan, later Malik, school of jurisprudence, as it is also the first to demonstrate in detail the various methods used, both linguistic and otherwise, in interpreting the legal verses of the Qur'an. It will be of interest to all those interested in the underlying bases of Islamic law and culture, and of particular interest to those involved in studying and teaching Islamic studies, both at undergraduate and research level. It will also be of interest to those studying the

relationship between orality and literacy in ancient societies and the writing down of ancient law.

**Orientalism and the Narration of a Sufi Past** Nur alhuda

These are some of the best-loved tales from the Quran and from the life of the Prophet Muhammad. Especially chosen for the very young, they provide a foundation on which to build a growing knowledge of the scriptures. This is story-telling at its best, with the meaning and message expressed in the simplest of words. As well as being easy to understand, these stories are also fun to read and share with others. Colourful, child-friendly illustrations complement the text and bring the stories vividly to life.

With all the warnings against women being pregnant after 35, I started to observe people who are pregnant during the [late age]. I cursed myself for not having this urge when I was 30, not a couple of years away from 40. Well, Nicole Kidman was having her first baby at 41, but obviously I'm not a Hollywood starlet with an army of top-notch doctors and babysitters. Or should I opt for adoption instead?

*The Muslim Creed* Institute of Southeast Asian Studies

Ideology has become increasingly central to work in translation studies. To date, however, most studies have focused on literary and religious texts, thus limiting wider understanding of how ideological clashes and encounters pervade any context where power inequalities are present. This special edition of *The Translator* deliberately focuses on ideology in the translation of a rich variety of lesser-studied genres, namely academic writing, cultural journals, legal and scientific texts, political interviews, advertisements, language policy and European Parliament discourse, in all of which translation as a social practice can be seen to shape, maintain and at times also resist and challenge the asymmetrical

nature of exchanges between parties engaged in or subjected to hegemonic practices. The volume opens with two ground-breaking papers that investigate the nature and representation of truth and knowledge in the translation of the sciences, followed by two contributions which approach the issue of shifts in the translation of ideology from the standpoint of critical linguistics and critical discourse analysis, using data from political speeches and interviews and from English and Korean versions of *Newsweek*. Other contributions discuss the role that translation scholars can play in raising public awareness of the manipulative devices used in advertising; the way in which potentially competing institutional and individual ideologies are negotiated in the context of interpreting in the European Union; the role translation plays in shaping the politics of a multilingual nation state, with reference to Belgium; and the extent to which the concepts of norms and polysystems may be productive in investigating the link between translation and ideology, with reference to Chinese data.
