Running a small, medium or large size business today has never been more demanding. The complexities involved in record keeping, accounting, tax, and other management tasks take up significant resources and time. And with profits always in mind, finding ways to stay competitive and building a robust set of systems, it can seem all too hard to invest the time required to optimise those accounting and management software solutions. In our experience most business owners or managers are simply not aware that there are better solutions in the marketplace. The hidden losses in any business occur when staff are performing tasks that are labor intensive involving hours of manual work in order to produce a result. Often these procedures can be streamlined or enhanced with the right solution and could repay the investment with just one area improved in your business! When you buy the book don't forget to register your book for the free bonuses. Details inside the book.

Administrative Management Woodhead Publishing

FCS Computer Hardware & Software L3 Springer

This book contains the revised selected, refereed papers from the IFIP World Conference on Computers in Education on Towards a Collaborative Society through Creative Learning, WCCE 2022, Hiroshima, Japan, August 20-24, 2022. A total of 61 papers (54 full papers and 7 short papers) were carefully reviewed and selected from 131 submissions. They were organized in topical sections as follows: Digital Education and Computing in Schools, Digital Education and Computing in Higher Education, National Policies and Plans for Digital Competence.

Flocking Together: An Indigenous Psychology Theory of Resilience in Southern Africa Springer

It's a common question but what makes a successful entrepreneur? Of course, this question starts a whole conversation about the definition of success. It's my belief that success isn't just about making money. Most people start a business for the freedom they expect it to give to them. The cold hard reality is that most entrepreneurs end up working longer hours and for a lot less than a typical wage. Why would any sane person work for less money, work much longer hours and have way less freedom than they probably had in a day job? The reason is they have a much bigger vision for their future than the average person. So why if someone works harder than an average worker then why doesn't every entrepreneur become massively successful? What is the secret that helps the budding entrepreneur become successful? It's probably a clique but there is a formula to it.;The challenge is that there are plenty of mad scientists out there selling you their secret formula. Often it really only works for them or a few followers. Why? Because they probably got lucky along the way. There are no real shortcuts to success, of course, there are exceptions to the rule.;It's called luck or being at the right place at the right time. ;But often even the overnight success stories actually have a hard-luck backstory and years of failure and frustration. This book is about the process, strategy, and implementation of your ideas.;The 5 stages are our way of showing you a viable success path and will help you understand the mindset you need to develop to achieve your definition of success.; You may be tempted to diagnose yourself at one stage and skip the stages prior.;The reality is that often problems and challenges occur due to lack of fundamentals. Finweek Aurum PressLtd

The study provides an overview of relevant legislation and policy in South Africa, pre- and post-1994, as well as a review of international research that reveals global trends in small media development. It sketches the distribution of the sector in South Africa, revealing the topography of service providers and key stakeholders. The report identifies the interests that are common to small independent and community media groupings and examines ways in which the sustainability of these organisations can be promoted. Providing a range of pertinent data, analysis and information, this study will be invaluable for anyone wishing to engage effectively with the small media sector. The Media Development and Diversity Agency (MDDA) was established to direct funding and support to the small media sector in the interests of deepening South Africa's young democracy. The principal objective of this study is to assist the MDDA in its important and complex work.

Applied Accounting for the Microcomputer User GRIN Verlag

These conference proceedings showcase a rich and practical exchange of approaches and vital evidence-based practices taking place around the world. They clarify the complex challenges involved in bringing about a holistic educational environment in schools and institutes of higher learning that fosters greater understanding and offer valuable insights on how to avoid the pitfalls that come with rolling out holistic approaches to education. To do so, the proceedings focus on the subthemes Support and Development, Mobility and Diversity and Networking and Collaboration in Holistic Education.

Towards a Collaborative Society Through Creative Learning Jonathan Ball Publishers

This book gathers selected high-quality research papers presented at the Sixth International Congress on Information and Communication Technology, held at Brunel University, London, on February 25-26, 2021. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The book is presented in four volumes.

Chartered Accountants Journal of New Zealand Evolve Systems Distribution Pty Ltd

This book gathers selected papers that were submitted to the 2021 International Conference on Digital Science (DSIC 2021) that aims to make available the discussion and the publication of papers on all aspects of single and multidisciplinary research on conference topics. DSIC 2021 was held on October 15-17, 2021. An important characteristic feature of conference is the short publication time and worldwide distribution. Written by respected researchers, the book covers a range of innovative topics related to: digital economics; digital education; digital engineering; digital environmental sciences; digital finance, business and banking; digital health care, hospitals and rehabilitation; digital media; digital medicine, pharma and public health; digital public administration; digital technology and applied sciences. This book may be used for private and professional non-commercial research and classroom use (e.g., sharing the contribution by mail or in hard copy form with research colleagues for their professional non-commercial research and classroom use); for use in presentations or handouts for any level students, researchers, etc.; for the further development of authors' scientific career (e.g., by citing, and attaching contributions to job or grant application).

Financial Accountant EvolveGlobalPublishing.com

This book describes how those individuals who are often most marginalised in postcolonial societies draw on age-old, non-western knowledge systems to adapt to the hardships characteristic of unequal societies in transformation. It highlights robust indigenous pathways and resilience responses used by elders and young people in urban and rural settings in challenging Southern African settings (South Africa, Namibia, Lesotho and Swaziland) to explain an Indigenous Psychology theory. Flocking (rather than fighting, fleeing, freezing or fainting) is explained as a default collectivist, collaborative and pragmatic social innovation to provide communal care and support when resources are constrained, and needs are par for the course. Flocking is used to address, amongst others, climate change (drought and energy use in particular), lack of household income and securing livelihoods, food and nutrition, chronic disease (specifically HIV / AIDS and tuberculosis), barriers to access services (education, healthcare, social welfare support), as well as leisure and wellbeing. The book further deliberates whether the continued use of such an entrenched socio-cultural response mollifies citizens and decision-makers into accepting inequality, or whether it could also be used to spark citizen agency and disrupt longstanding structural disparities.

The book has been specifically designed to include all topics covered in first courses in accounting in higher education. In addition, it caters for the curriculum of professional bodies which examine students for entry into business and accounting careers.

The 5 Stages To Entrepreneurial Success Graphic Communications Group

The Solicitors' Disciplinary Tribunal's annual report for 2002 stated that financial irregularity and breaches of the Solicitors' Accounts Rules were the predominant cause of misconduct in around a third of the cases it heard. This book offers a comprehensive guide to solicitors' accounts. It starts with basic bookkeeping principles and develops an analysis of the provisions of the Solicitors' Accounts Rules 1998. This leads to an explanation of specific areas, for example, VAT accounting for disbursements, stakeholding and retirement from practice. Accounts for Solicitors will be of value to solicitors, their accounting staff as well as students on the Legal Practice Course and trainees.

National Business Bulletin Springer Nature

You have a residential investment property. Perhaps you are already renting it out. But are you doing it like a pro and do you know how to maximise your return from it? In this book, property management expert David Beattie distils two decades of experience into easy-to-implement steps

and shows you how to manage your property like a professional landlord. His goal is to help you make more money in less time and with fewer hassles, by showing you how to run your property investment like a business; navigate and comply with South African rental laws with ease; attract, screen, place and keep high-quality tenants; ensure successful and consistent rent collection; and maintain your property with the least effort and money. The book also includes templates for all the documents the prospective landlord needs.

Computers & Communications in Africa Pearson South Africa

This book constitutes the proceedings of the 16th International Conference on Perspectives in Business Informatics Research, BIR 2017, held in Copenhagen, Denmark, in August 2017. This year the BIR conference attracted 59 submissions from 23 countries. They were reviewed by 45 members of the Program Committee, and as a result, 17 full papers and 3 short papers were selected for presentation at the conference and publication in this volume. They are organized in sections on enterprise architecture, business process management, business analytics, information systems applications, and information systems development. In addition, the summaries of the two conference keynotes are also included. This year, the conference theme was the digital transformation, which will impact most businesses, organizations and societies and call for new and radical approaches to how we adopt, use and manage IT.

Accounting Ledger Book RainbowSA

The roles and responsibilities of administrative managers are identified and explained in this comprehensive resource on managing the information needs of an organization to facilitate timely, relevant, and accurate communication. Topical case studies and practical examples illustrate the knowledge and skills required for success in office management.

The People's Voice HSRC Press

Information Systems for the Fashion and Apparel Industry brings together trends and developments in fashion information systems, industrial case-studies, and insights from an international team of authors. The fashion and apparel industry is fast-growing and highly influential. Computerized information systems are essential to support fashion business operations and recent developments in social media, mobile commerce models, radio frequency identification (RFID) technologies, and ERP systems are all driving innovative business measures in the industry. After an introductory chapter outlining key decision points and information requirements in fast fashion supply chains, Part One focuses on the principles of fashion information systems, with chapters covering how decision making in the apparel supply chains can be improved through the use of fuzzy logic, RFID technologies, evolutionary optimization techniques, and artificial neural networks. Part Two then reviews the range of applications for information systems in the fashion and apparel industry to improve customer choice, aid design, implement intelligent forecasting and procurement systems, and manage inventory and returns. Provides systematic and comprehensive coverage of information systems for the fashion and apparel industry Combines recent developments and industrial best-practices in apparel supply chain management in order to meet the needs of the fashion and apparel industry professionals and academics Features input from a team of highly knowledgeable authors with a range of professional and academic experience, overseen by an editor who is a leading expert in the field Reviews the range of applications for information systems in the fashion and apparel industry to improve customer choice, aid design, implement intelligent forecasting and procurement systems, and manage inventory and returns
