Amelia Kurt was different. And she knew it. That didn't stop her from loving her best friend, Annabelle Johnson. They spent an entire summer making love, and growing into what was

promising to be the only relationship either ever knew. Then, one day, the unexpected happens. Anna disappears. No reason, no forwarding address, no number. She was simply gone. Eleven years later, Anna returns. Her truth is heartbreaking but it's only the beginning of their journey to recovery.

The world's premier obstetrics guide—now updated with a greater focus on maternal-fetal medicine The obstetrics text that has defined the discipline for generations of obstetrician-gynecologists is now more timely—and essential—than ever. Written by authors from the nationally known University of Texas Southwestern Medical Center, Williams Obstetrics maintains its trademark comprehensive coverage and applicability at the bedside, while offering the most current perspective of the field. This landmark text begins with fundamental discussions of reproductive anatomy and physiology. These dovetail into clinical chapters covering obstetrical complications such as preterm labor, pregnancy-related infection, hemorrhage, and hypertension, among others. Representing the culmination of a century of clinical thought, the new Twenty-Fifth Edition is enhanced by more than 1,000 full-color illustrations plus an increased emphasis on the fast-growing subspecialty of maternal-fetal medicine. Features •Entire section on the diagnosis and treatment of fetal disorders, providing deeper insights into fetal complications in utero •Traditional focus on the varied medical

and surgical disorders that can complicate pregnancy •1,000 eye-catching illustrations, including updated graphs, sonograms, MRIs, photographs, and photomicrographs •Solid evidence-based approach highlights the scientific underpinnings of clinical obstetrics, with special emphasis on physiological principles •Current professional and academic guidelines are incorporated into the text and appear in easy-to-read tables •Updated with 3,000 new literature citations through 2017 No other text can match the long-established scientific rigor and accessibility of Williams Obstetrics. With its state-of-the-art design and review of the newest advances and protocols, this not-be-missed clinical companion brings positive outcomes within reach.

How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, Shadow Libraries explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, Shadow Libraries explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from

unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Mercedes-Benz - The Grand Cabrios & Coupés MIT Press

Mercedes Benz has now been manufacturing SL sports cars for fifty years, and for all that time the cars adorned with those two special letters have been admired and coveted by car lovers the world over. It all started in 1954, with the fabulous and iconic 300SL Gullwing, a road car developed directly from the stunning 300SLR racing car. Other models followed, including the more affordable 190SL, the 'Pagoda' car of the sixties and the stylish ranges of the seventies and eighties. Mercedes now use the SL

tag before rather than after the numbers in the cars' designations, but the line is as strong as ever, with a magnificent new range and an SLR supercar developed with McLaren that takes the family right back to its roots.

This 370 pages book is the second and revised edition, published in March 2014. Next to the history of the modern SL, from the 1971 350SL R107 to the 2013 SL65 AMG R231, it deals with the extremely rare history of the R107 500SL rally car, of which Daimler AG today only has a replica. The two sole surviving original cars, which have an additional interesting history all to their own, are today in private hands. The book also lets the reader experience driving a RENNtech R129 SL600 7.4 and it covers all R129 and R230 Special Edition models ever offered by the company. Over 400 photos give a detailed view of these beautiful cars. Most of them are non-Daimler-Benz photos and have never been published in a book before. The author Bernd S. Koehling has over 20 e-books and books about Mercedes-Benz to his credit. For a FREE BONUS please scroll to the bottom of this description. This guide covers the Mercedes SL R107 series with all 6- and 8-cylinder engines the US versions with their reduced power output the forgotten 500SL Rally car the 1980 and 1985 face lift and the still young tuning scene with companies such as Brabus, AMG and Koenig The Mercedes SL R129 series with all 6-, 8- and 12-cylinder engines the 1995 and 1998 facelift its AMG derivations from the SL36 to the SL73 all Special Edition cars, including the rare 1997 La Costa Edition tuners such as Brabus, Hagmann, RENNtech, Carlsson and Koenig a test drive with a RENNtech SL600 7.4 plus the Middelhaue SL Grand and the

equally unique Gullwing Karmann SL The Mercedes SL R230 series with all 6-, 8- and 12-cylinder engines the 2006 and 2008 facelift a problematic SBC braking system its AMG derivations from the SL55 to the SL65 Black Series all Special Edition cars, including the 2008 IWC and the 2010 Night Edition tuners such as Brabus with the SL65 Vanish and Stealth, RENNtech, Carlsson, MKB and Asma The Mercedes SL R231 series with its 6-, 8-cylinder engines its AMG derivations from the V8 SL55 to the V12 SL65 45th Anniversary Edition and the alternatives to the new SL including a comparison with the BMW 650i Cabriolet This revised edition includes updated technical information for the R107 and adds more photos. It also deals with the sales performance of the individual models and offers detailed technical specifications of each model at the end of the book. Mercedes-Benz E-class Owner's Bible, 1986-1995 John Wiley & Sons

You haven't gotten yourself a R107 yet? Too bad, the good ones can cost a small fortune today and they have only one way to go: UP! But don't worry, plenty of them have been built and plenty of them are still around. Problem is, which one is the right one for you? Can you imagine that even a low mileage, good looking R107 can still far exceed your wildest imaginations, when it comes to restoration costs? Everybody seems to want a late model 560SL. Why not an early 450SL for half the money? The

joy and pride of ownership is the same, trust me. Or how about one of the former longtime underdogs, an SLC? Also they start to appreciate, a few of them even very fast, faster than a mint 560SL. If any of this is of interest, then this new book (published already earlier as e-book) is for you. It does not only deal with development and history, it also comes with a comprehensive buyer's guide for both the SL and SLC. This includes a look at their price development over the past years. Another focus has been the VIN and data card, so that you have a better understanding, how they were equipped and to which market they have been shipped first. Superb recent photography from the author's collection can help you to find the right car or it might even serve as reference in a restoration project. Naturally the paint and interior upholstery options, full technical details plus the annual production history of each model are covered. As a bonus, rare insights into the R107's almost unknown rally history are given. FREE BONUS: When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W111 or W198 or R107 for example) the author has covered in one of his books. Please contact the author through his website (inside the book) and stipulate, which free pdf file you want him to send to you.

Nothing says summer like driving a convertible. The car without a roof has always been a symbol for luxury and laissez-faire. And it still holds true today: everybody who's anybody drives "topless." The larger four-seater convertibles in particular have always been highly sought after--but they are difficult to build and have usually been made as coupés for this reason. Mercedes-Benz has always been a pioneer in this area. 'Mercedes-Benz: The Grand Cabrios & Coupes' gives us a peek at the long-standing partnership between Mercedes-Benz and Stuttgart-based photographer, Rene Staud. Carefully staged photos show graceful curves and precision down to the finest details that convey the company's dedication to a very special kind of driving pleasure. This volume presents the most important convertibles and related coupes from 100 years of Daimler automotive history. A special highlight is Daimler's new flagship, a convertible based on the new S-class that is being rolled out at the 2015 IAS. Even though summer eventually comes to an end, and sunny days can give way to showers, this book stands for everlasting convertible adventures. AUTHOR: Photographer Rene Staud made a breakthrough with the development of his Magicflash lighting technology; this type of surface lighting helps him greatly in his ad photos for top-shelf automakers. Staud and his team continue to develop new ways to meet the highest demands of the industry in both creativity and service. He has amassed 35 years of experience in ad photography; and has literally built the image of many companies with his photos. SELLING POINTS: * Open this glorious photo book and experience the classic Mercedes-Benz convertibles and the newest models in such realistic detail, you'll want to touch them * Elegantly-staged cars that made

automotive history * Breathtaking curves that make "driving topless" a delight

"Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowned collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the

field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET.

The end of the Cold War and the discussions concerning the process of globalization have brought the study of international politics face to face with new issues such as human rights, humanitarian interventions, environmental concerns, global social movements and health issues like HIV/AIDS. The challenges arising from these issues require novel theoretical approaches that are not limited to the traditional ethical concerns of international politics. The contributors to this volume re-examine existing approaches and formulate new ethical perspectives for the twenty-first century. This volume challenges the status quo in international relations and provides an opening for an alternative theoretical debate for those who are interested in international political theory.

The rich have always been different from you and me, but this revealing and funny journey through "Richistan" entertainingly shows that they are more different than ever. Richistanis have

400-foot-yachts, 30,000-square-foot homes, house staffs of more than 100, and their own “arborists.” They’re also different from Old Money, and have torn down blue-blood institutions to build their own shining empire. Richistan is like the best travel writing, full of colorful and interesting stories providing insights into exotic locales. Robert Frank has been loitering on the docks of yacht marinas, pestering his way into charity balls, and schmoozing with real estate agents selling mega-houses to capture the story of the twenty-first century’s nouveau riche: House-training the rich. People with new wealth have to be taught how to act like, well, proper rich people. Just in the nick of time, there’s been a boom in the number of newly trained butlers—“household managers”—who will serve just the right cabernet when a Richistani’s new buddies from Palm Beach stop by. “My boat is bigger than your boat.” Only in Richistan would a 100-foot-boat be considered a dinghy. Personal pleasure craft have started to rival navy destroyers in size and speed. Richistan is also a place where friends make fun of those misers who buy the new girlfriend a mere Mercedes SLK. “You want my money? Prove that you’re helping the needy!” Richistanis are not only consuming like crazy, they’re also shaking up the establishment’s bureaucratic, slow-moving charity network, making lean, results-oriented philanthropy an important new driving force. Move over,

Christian Coalition. Richistanis are more Democratic than Republican, “fed up and not going to take it anymore,” and willing to spend millions to get progressive-oriented politicians elected. “My name is Mike and I’m rich.” Think that money is the answer? Think again as Robert Frank explores the emotional complexities of wealth. And, as Robert Frank reveals, there is not one Richistan but three: Lower, Middle, and Upper, each of which has its own levels and distinctions of wealth—the haves and the have-mores. The influence of Richistan and the Richistanis extends well beyond the almost ten million households that make up its population, as the nonstop quest for status and an insatiable demand for luxury goods reshapes the entire American economy.

In Southern Africa, marriage used to be widespread and common. However, over the past decades marriage rates have declined significantly. Julia Pauli explores the meaning of marriage when only few marry. Although marriage rates have dropped sharply, the value of weddings and marriages has not. To marry has become an indicator of upper-class status that less affluent people aspire to. Using the appropriation of marriage by a rural Namibian elite as a case study, the book tells the entwined stories of class formation and marriage decline in post-apartheid Namibia.
