 252 pages, and more than 240 illustrations and charts, size 8.25 x 10.75 inches. This publication is a faithful reproduction of the 1962-1965 BSA Factory Workshop Manual part number 00-4113 that covers the A50

(500cc) and A65 (650cc) unit-construction twins manufactured between August 1961 through the end of July 1965. It should be noted that BSA model years ran from August through July. For example, the 1962 models were released in August 1961, the 1963 models in August 1962 etc. This can, at times, cause confusion and the only sure method of determining 'what year is it?' is by the serial number. The various engine and frame numbers for the 1962 to 1965 unit-construction twins are shown in the table below. Note that the pre-1966 engine and frame numbers seldom matched. MODEL KEY: C = Cyclone, CC = Cyclone Competition, L = Lightning, LC = Lightning Clubman, LR = Lightning Rocket, R = Rocket, S = Star, SH = Spitfire Hornet, TR = Thunderbolt Rocket. EXTENSION (-) KEY: CB = Cable (Rear) Brake, CR = Close Ratio Gearbox,

PM = Police Model, RB = Rod (Rear) Brake, RC = Rev Counter, UK = United Kingdom Model, US = USA Model. 1962 Engine/Frame A50S-CB A50-101/A50-101 A50S-RB A50-101/A50A-101 A65S-CB A65-101/A50-101 A65S-RB A65-101/A50A-101 1963 Engine/Frame A50S-CB A50-823/A50-2288 A50S-RB A50-823/A50-2701 A65S-CB A65-1947/A50-2288 A65S-RB A65-1947/A50-2701 1964 Engine/Frame A50S A50A-101/A50-5501 A50-PM A50AP-101/A50-5501 A50C-US A50B-101/A50B-101 A50C-CR A50B-C101/A50B-101 A65S A65A-101/A50-5501 A65-PM A65AP-101/A50-5501 A65R A65B-101/A50B-101 A65R-RC A65C-101/A50-5501 A65TR A65B-101/A50-5501 A65LR A65D-101/A50B-101 A65SH A65E-101/A50B-101 1965 Engine/Frame

"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle,

you probably don't.

When Ducati's great engineer Fabio Taglioni designed the 750 Ducati in 1970 there was no way he could comprehend how important this model would be. His design was unlike any other before or since: a 90-degree V-twin with single overhead camshafts driven by a train of bevel gears. Taglioni soon developed his 750 into a Formula 750 racer, and in 1972 beat the rest of what the world had to offer at the Imola 200. With this victory, the desmodromic 750 became a legend. Ducati responded by producing a hand-built limited production desmodromic Super Sport. They also continued to produce the touring 750 GT and sporting 750 Sport until legislation killed them at the end of 1974. Today, this triumvirate of 750s represents the end of an era; the era before cost accounting and government design requirements. These were amongst the last pure, unadulterated sporting motorcycles built and it is not surprising they have inspired a new generation of retro classics, the Sport Classic of 2005 and 2006. Author Ian Falloon is a Ducati expert with several books on the marque including the best-selling *The Ducati Story*, and *Ducati Twins Restoration Guide*. He has owned several 750s over the years and has a particular enthusiasm for this model, still owning the 750 Super Sport he bought back in the 1970s.

Velocette is one of the most respected names in the history of the motorcycle. Though not as numerous or as successful, as some machines, the motorbikes produced by the Veloce company in Birmingham command a special respect and an extremely loyal following, and machines such as the KTT and Thruxton are among the most desirable classic bikes you can buy today. In this book motorcycle historian, Mick Walker, chronicles the history of the Veloce company and the bikes they produced between 1905 and the winding up of the company in 1971.

The treatment of American Indians is discussed historically with reference to the 4 principal methods used to create or perpetuate false impressions: obliteration, defamation, disembodiment, and disparagement. Indian contributions to American civilization are cited in contrast with historical references to Indians in textbooks. The author suggests specific reading materials for various age levels which reflect accurately the cultural contributions of the Indian. A bibliography on the American Indian influence on American civilization is appended. (Jh).
