A Brief History of Neoliberalism Verso

David Harvey examines the foundational contradictions of capital, and reveals the fatal contradictions that are now inexorably leading to its end

David Harvey's Geography (RLE Social & Cultural Geography) Oxford University Press, USA

Largely concerned with 19th century Paris.

Postmodern Geographies Oxford University Press, USA

This is the first book to bring together an interdisciplinary, theoretically engaged and global perspective on the First World War through the lens of historical and cultural geography. Reflecting the centennial interest in the conflict, the collection explores the relationships between warfare and space, and pays particular attention to how commemoration is connected to spatial elements of national identity, and processes of heritage and belonging. Venturing beyond military history and memory studies, contributors explore conceptual contributions of geography to analyse the First World War, as well as reflecting upon the imperative for an academic discussion on the War's centenary. This book explores the War's impact in more unexpected theatres, blurring the boundary between home and fighting fronts, investigating the experiences of the war amongst civilians and often overlooked combatants. It also critically examines the politics of hindsight in the post-war period, and offers an historical geographical account of how the First World War has been memorialised within 'official' spaces, in addition to those overlooked and often undervalued 'alternative spaces' of commemoration. This innovative and timely text will be key reading for students and scholars of the First World War, and more broadly in historical and cultural geography, social and cultural history, European history, Heritage Studies, military history and memory studies.

Uneven Development Routledge

David Harvey is unquestionably the most influential, as well as the most cited, geographer of his generation. His reputation extends well beyond geography to sociology, planning, architecture, anthropology, literary studies and political science. This book brings together for the first time seminal articles published over three decades on the tensions between geographical knowledges and political power and on the capitalist production of space. Classic essays reprinted here include

'On the history and present condition of geography', 'The geography of capitalist accumulation' and 'The spatial fix: Hegel, von Thunen, and Marx'. Two new chapters represent the author's most recent thinking on cartographic identities and social movements. David Harvey's persistent challenge to the claims of ethical neutrality on behalf of science and geography runs like a thread throughout the book. He seeks to explain the geopolitics of capitalism and to ground spatial theory in social justice. In the process he engages with overlooked or misrepresented figures in the history of geography, placing them in the context of intellectual history. The presence here of Kant, Von Thunen, Humboldt, Lattimore, Leopold alongside Marx, Hegel, Heidegger, Darwin, Malthus, Foucault and many others shows the deep roots and significance of geographical thought. At the same time David Harvey's telling observations of current social, environmental, and political trends show just how vital that thought is to the understanding of the world as it is and as it might be.

Spaces of Neoliberalization Psychology Press

Collecting David Harvey's finest work on Paris during the second empire, *Paris, Capital of Modernity* offers brilliant insights ranging from the birth of consumerist spectacle on the Parisian boulevards, the creative visions of Balzac, Baudelaire and Zola, and the reactionary cultural politics of the bombastic Sacre Couer. The book is heavily illustrated and includes a number drawings, portraits and cartoons by Daumier, one of the greatest political caricaturists of the nineteenth century.

The Urban Experience Verso Books

David Harvey is one of most famous Marxist intellectuals in the past half century, as well as one of the world's most cited social scientists. Beginning in the early 1970s with his trenchant and still-relevant book *Social Justice and the City* and through this day, Harvey has written numerous books and dozens of influential essays and articles on topics across issues in politics, culture, economics, and social justice. In *The Ways of the World*, Harvey has gathered his most important essays from the past four decades. They form a career-spanning collection that tracks not only the development of Harvey over time as an intellectual, but also a dialectical vision that gradually expanded its reach from the slums of Baltimore to global environmental degradation to the American imperium. While Harvey's coverage is wide-ranging, all of the pieces tackle the core concerns that have always animated his work: capitalism past and present, social change, freedom, class, imperialism, the city, nature, social justice, postmodernity, globalization, and the crises that inhere in capitalism. A career-defining volume, *The Ways of the World* will stand as a comprehensive work that presents the trajectory of Harvey's lifelong project in full.

Key Concepts in Economic Geography Hurst Publishers

"There is no question that David Harvey's work has been one of the most important, influential, and imaginative contributions to the development of human geography since the Second World War. . . . His readings of Marx are arresting and original--a remarkably fresh return to the foundational texts of historical materialism."--Derek Gregory, author of *Geographical Imaginations*

Consciousness and the Urban Experience Profile Books

For three centuries the capitalist system has shaped western society, informed its rulers, and

conditioned the lives of its people. Has the time come to move beyond it? Using his unrivalled knowledge of the subject, Harvey lays bare the follies of the international financial system, looking at the nature of capitalism, how it works and why sometimes it doesn't. He examines the vast flows of money that surge round the world in daily volumes well in excess of the sum of all its economies. He looks at the cycles of boom and bust in the world's housing and stock markets and shows that periodic episodes of meltdown are not only inevitable in the capitalist system but essential to its survival. *The Enigma of Capital* is a timely call-to-arms for the end of the capitalism, and makes a compelling case for a new social order that would allow us to live within a system that could be responsible, just and humane

The New Imperialism Verso Books

Manifesto on the urban commons from the acclaimed theorist.

Consciousness and the Urban Experience Verso Books

Neoliberalism - the doctrine that market exchange is an ethic in itself, capable of acting as a guide for all human action - has become dominant in both thought and practice throughout much of the world since 1970 or so. Its spread has depended upon a reconstitution of state powers such that privatization, finance, and market processes are emphasized. State interventions in the economy are minimized, while the obligations of the state to provide for the welfare of its citizens are diminished. David Harvey, author of 'The New Imperialism' and 'The Condition of Postmodernity', here tells the political-economic story of where neoliberalization came from and how it proliferated on the world stage. While Thatcher and Reagan are often cited as primary authors of this neoliberal turn, Harvey shows how a complex of forces, from Chile to China and from New York City to Mexico City, have also played their part. In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W. Bush. Finally, through critical engagement with this history, Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us, but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements.

Spaces of Global Capitalism John Wiley & Sons

This book engages with the politics of social and environmental justice, and seeks new ways to think about the future of urbanization in the twenty-first century. It establishes foundational concepts for understanding how space, time, place and nature - the material frames of daily life - are constituted and represented through social practices, not as separate elements but in relation to each other. It describes how geographical differences are produced, and shows how they then become fundamental to the exploration of political, economic and ecological alternatives to contemporary life. The book is divided into four parts. Part I describes the problematic nature of action and analysis

at different scales of time and space, and introduces the reader to the modes of dialectical thinking and discourse which are used throughout the remainder of the work. Part II examines how "nature" and "environment" have been understood and valued in relation to processes of social change and seeks, from this basis, to make sense of contemporary environmental issues. Part III, is a wide-ranging discussion of history, geography and culture, explores the meaning of the social "production" of space and time, and clarifies problems related to "otherness" and "difference". The final part of the book deploys the foundational arguments the author has established to consider contemporary problems of social justice that have resulted from recent changes in geographical divisions of labor, in the environment, and in the pace and quality of urbanization. *Justice, Nature and the Geography of Difference* speaks to a wide readership of students of social, cultural and spatial theory and of the dynamics of contemporary life. It is a convincing demonstration that it is both possible and necessary to value difference and to seek a just social order.

Paris, Capital of Modernity OUP Oxford

"My aim is to get you to read a book by Karl Marx called *Capital*, Volume 1, and to read it on Marx's own terms..." The biggest financial crisis since the Great Depression has generated a surge of interest in Marx's work in the effort to understand the origins of our current predicament. For nearly forty years, David Harvey has written and lectured on *Capital*, becoming one of the world's most foremost Marx scholars. Based on his recent lectures, this current volume aims to bring this depth of learning to a broader audience, guiding first-time readers through a fascinating and deeply rewarding text. *A Companion to Marx's Capital* offers fresh, original and sometimes critical interpretations of a book that changed the course of history and, as Harvey intimates, may do so again. In *Uneven Development*, a classic in its field, Neil Smith offers the first full theory of uneven geographical development, entwining theories of space and nature with a critique of capitalism. Featuring groundbreaking analyses of the production of nature and the politics of scale, Smith's work anticipated many of the uneven contours that now mark neoliberal globalization. This third edition features an afterword examining the impact of Neil's argument in a contemporary context.

Cosmopolitanism and the Geographies of Freedom Routledge

This book critically interrogates the work of David Harvey, one of the world's most influential geographers, and one of its best known Marxists. Considers the entire range of Harvey's oeuvre, from the nature of urbanism to environmental issues. Written by contributors from across the human sciences, operating with a range of critical theories. Focuses on key themes in Harvey's work. Contains a consolidated bibliography of Harvey's writings.

Key Texts in Human Geography Taylor & Francis

This book is prepared in a way which recognises the needs of police officers, those who wish to study the criminal law, and members of the public who wish to refer to a legal text which is written in terms which they can understand. The text sets out to cover comprehensively those areas of law and legal procedures with which all police officers are concerned. The syllabus of the qualifying examinations for promotion has been borne in mind throughout, and this edition has been brought up to date with developments in the law since the publication of the seventh edition in 2001.

It will find itself at the top of a thousand module handouts. - THE Textbook Guide "Will surely become a 'key text' itself. Read any chapter and you will want to compare it with another. Before you realize, an afternoon is gone and then you are tracking down the originals." - Professor James Sidaway, University of Plymouth 'An essential synopsis of essential readings that every human geographer must read. It is highly recommended for those just embarking on their careers as well as those who need a reminder of how and why geography moved from the margins of social thought to its very core.' - Barney Warf, Florida State University Undergraduate geography students are often directed to 'key' texts in the literature but find them difficult to read because of their language and argument. As a result, they fail to get to grips with the subject matter and gravitate towards course textbooks instead. Key Texts in Human Geography serves as a primer and companion to the key texts in human geography published over the past 40 years. It is not a reader, but a volume of 26 interpretive essays highlighting: the significance of the text how the book should be read reactions and controversies surrounding the book the book's long-term legacy. It is an essential reference guide for all students of human geography and provides an invaluable

interpretive tool in answering questions about human geography and what constitutes geographical knowledge.

David Harvey Routledge

Liberty and freedom are frequently invoked to justify political action. Presidents as diverse as Woodrow Wilson, Franklin Delano Roosevelt, John F. Kennedy, Ronald Reagan, and George W. Bush have built their policies on some version of these noble values. Yet in practice, idealist agendas often turn sour as they confront specific circumstances on the ground. Demonstrated by incidents at Abu Ghraib and Guantánamo Bay, the pursuit of liberty and freedom can lead to violence and repression, undermining our trust in universal theories of liberalism, neoliberalism, and cosmopolitanism. Combining his passions for politics and geography, David Harvey charts a cosmopolitan order more appropriate to an emancipatory form of global governance. Political agendas tend to fail, he argues, because they ignore the complexities of geography. Incorporating geographical knowledge into the formation of social and political policy is therefore a necessary condition for genuine democracy. Harvey begins with an insightful critique of the political uses of freedom and liberty, especially during the George W. Bush administration. Then, through an ontological investigation into geography's foundational concepts space, place, and environment he radically reframes geographical knowledge as a basis for social theory and political action. As Harvey makes clear, the cosmopolitanism that emerges is rooted in human experience rather than illusory ideals and brings us closer to achieving the liberation we seek.
