Fundamentals of Financial Management, Concise Edition

Cambridge Scholars Publishing

Asian economies continue to be subject to new shocks: US monetary policy tightening, the adoption of negative-interest-rate policies by central banks all over the world, the slowdown of the People's Republic of China, and the sharp drop in oil and other commodity prices. All these highlight the vulnerability of the

region to volatile trade and capital flows even as the global and Asian regional financial architecture evolves. This volume analyzes the vulnerabilities of Asian economies to external economic and financial shocks and assesses the performance of Asian regional institutions in financial surveillance and cooperation. It also evaluates ongoing reforms of the global financial architecture, including the International Monetary Fund (IMF), the Financial Stability Board, and reviews the experience of the "Troika" (European Commission, European Central Bank, and the IMF) in managing the European sovereign debt and banking crisis. Based on these, the book develops valuable

recommendations to strengthen the Asian regional financial architecture and improve cooperation with global multilateral institutions.

Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.
