 That version of the 9-12 standards you wish you had If you're a high school teacher, no need to

despair. Jim Burke has created a Common Core Companion for you, too. This time positioning the grades 9-10 standards alongside 11-12, it's every bit the roadmap to what each standard says, what each standard means, and how to put that standard into practice across subjects. Jim clearly lays out: - Key distinctions across grade levels - Different content-area versions of each standard - Explanations of each standard, with student prompts - Content to cover, lesson ideas, and instructional techniques - Glossary and adaptations for ELL students
Tender Is The Night & The Great Gatsby Eye On Education
 Dirigido a estudiantes de la UNED para la asignatura "Literatura Norteamericana y Contemporanea" del grado "Estudios Ingleses: Lengua, Literatura y Cultura". Ofrece un recorrido por la vida de los autores, las preocupaciones del siglo XX en la literatura americana y presta principal atención al modernismo y al posmodernismo como grandes momentos culturales.
The Great Gatsby in the Classroom Routledge
 A self-portrait of a great writer. A Short Autobiography charts Fitzgerald's progression from exuberant and cocky with "What I think and Feel at 25", to mature and reflective with "One Hundred False Starts" and "The Death of My Father." Compiled and edited by Professor James

West, this revealing collection of personal essays and articles reveals the beloved author in his own words.

 Universities have stood for 900 years in Western culture with most of their institutional structures essentially unchanged. They still serve three basic functions: educating the faculty, teaching students and gathering knowledge. Funding is, and always has been, the main difficulty within universities and most of the problems critics point to can be traced to a lack of it—universities, it seems, are always in crisis. The authors demonstrate that universities are in fact doing well. They generate an immense amount of research and drive the development of new technologies. On the whole, faculty members teach pretty well and students are in fact learning (at least something), and the challenges of inadequate funding are faced with adequate success.

Camera Works is about the impact of photography and film on modern art and literature. For many artists and writers, these new media offered hope of new means of representation, neither linguistic nor pictorial, but hovering in a kind of utopian space between. At the same time, the new media introduced a dramatic element of novelty into the age-old evidence of the senses. For the avant-garde, the challenges of the new media were the modern in its most concentrated form, but even for aesthetically unadventurous writers they constituted an element of modern experience that could hardly be ignored. Camera Works thus traces some of the more utopian projects of the transatlantic avant-garde, including the Readie machine of Bob Brown, which was to turn stories and poems into strips of linguistic film. The influence of photography and film on the avant-garde is traced from the early days of Camera Work, through the enthusiasm of Eugene Jolas and the contributors to his magazine transition, to the crisis created by the introduction of sound in the late 1920s. Subsequent chapters describe the entirely new kind of sensory enjoyment brought into modern American fiction by the new media. What Fitzgerald calls "spectroscopic gayety," the enjoyable disorientation of the senses by machine perception, turns out to be a powerful force in much American fiction. The revolutionary possibilities of this new spectatorship and its limitations are pursued through a number of examples, including Dos Passos, James Weldon Johnson, and Hemingway. Together, these chapters offer a new and substantially different account of the relationship between modern American literature and the mediatised society of the early twentieth century. With a comprehensive introduction and detailed particular readings, Camera Works substantiates a new understanding of the formal and historical bases of modernism. It argues that when modern literature and art respond to modernity, on a formal level, they are responding to the intervention of technology in the transmission of meaning, an intervention that unsettles all the terms in the essential relationship of human consciousness to the world of phenomena.

Following in the steps of the socio-political turn of the discipline, Equity in Mathematics Education: Addressing a Changing World emerged as a response of the editor and the chapter authors to the enormous changes that have in the last years occurred at a global level (for example, the ongoing war in Syria, the political [in]actions of powerful nations to fight climate change, the rise of far-right parties in many countries around the world, and so on). In recent years, massive migration waves from the Middle East have caused significant demographic changes to many European countries, Canada and the US, that are reflected in schools and classrooms. These observations have led this book's contributors to reconsider the concept and/or practice of equity, and its related concept, social justice, and the role of mathematics education research in addressing and promoting a fairer world. Contrary to other, perhaps highly specialized books concerned with similar topics, this book aims to provide a smooth, yet deep introduction to those who are new to this research area. Equity in Mathematics Education: Addressing a Changing World contributes to the understanding of equity and its complex relations to mathematics education. It is anticipated that it will support individuals in teaching, educational research, policy making and planning, and teacher education, in becoming more aware of the interplay between school mathematics and socio-political issues that, ultimately, impacts the lives of learners and their communities, teachers as practitioners and as citizens, the wider society, and the world as a whole. Even though each chapter can be read independently of others, an engagement with all chapters in this volume will provide readers with a solid holistic understanding of the research territory of equity and mathematics education.

Volume Three: 1956 - 1999 Oxford University Press

From the author of *Crying*, a witty, wide-ranging cultural history of our attitudes toward work—and getting out of it Couch potatoes, goof-offs, freeloaders, good-for-nothings, loafers, and loungers: ever since the Industrial Revolution, when the work ethic as we know it was formed, there has been a chorus of slackers ridiculing and lampooning the pretensions of hardworking respectability. Reviled by many, heroes to others, these layabouts stretch and yawn while the rest of society worries and sweats. Whenever the world of labor changes in significant ways, the pulpits, politicians, and pedagogues ring with exhortations of the value of work, and the slackers answer with a strenuous call of their own: "To do nothing," as Oscar Wilde said, "is the most difficult thing in the world." From Benjamin Franklin's "air baths" to Jack Kerouac's "dharma bums," Generation-X

slackers, and beyond, anti-work-ethic proponents have held a central place in modern culture. Moving with verve and wit through a series of fascinating case studies that illuminate the changing place of leisure in the American republic, *Doing Nothing* revises the way we understand slackers and work itself.

To cope with the pandemic, many educational institutions in the United States have resorted to emergency remote teaching (ERT). Distance/online learning is a complex process in terms of the design, analysis, and time taken to develop and implement courses and programs. Having been around for decades, it has evolved and morphed into a multidimensional procedure that needs meticulous planning, evolution, and evaluation. It provides meaningful learning experiences to students who may not otherwise have the option to attend college. Students of distance/online courses and programs usually choose to join voluntarily, and designers of such programs purposefully plan for them to be online from the start. In contrast, ERT is an emergency/crisis-based need to move teaching and learning to alternative environments until the crisis is averted or ended. *Preparing Faculty for Technology Dependency in the Post-COVID-19 Era* is a comprehensive guide that focuses on preparing pre-service teachers, in-service teachers, and higher education faculty to harness technology dependence in an emergency remote teaching era by discussing current and post-pandemic preparedness. Covering a wide range of topics such as digital reality, teacher preparedness, and technology dependency, this book is crucial for educators, administrators, pre-service teachers, researchers, academicians, and students.

This study explores the vestiges of primitive sacrificial rituals that emerge in a group of canonical modernist novels, including *The Turn of the Screw*, *Heart of Darkness*, *The Good Soldier*, *The Great Gatsby*, and *To the Lighthouse*. It argues that these novels reenact a process that achieved its seminal expression in the Genesis story of *The Binding of Isaac*, in which Abraham, having been prevented from sacrificing Isaac, offers up a ram in his place. Modernist reenactments of this pattern present narrators who, although vigorously protesting the victimization of certain characters, unflinchingly seize upon others as their surrogates. Each novel is designed in such a way, however, as to resist the reconstruction of a sacrificial ritual to which its narrator is prone. The resulting tension between the binding and unbinding of ritual persecution dramatizes the paradox that we can neither believe convincingly in the guilt of our scapegoats nor imagine a society that has dispensed with them entirely. Thomas Cousineau is Professor of English at Washington College in Maryland.

Remaking the American Patient Farrar, Straus and Giroux

In a work that spans the twentieth century, Nancy Tomes questions the popular--and largely unexamined--idea that in order to get good health care, people must learn to shop for it. *Remaking the American Patient* explores the consequences of the consumer economy and American medicine having come of age at exactly the same time. Tracing the robust development of advertising, marketing, and public relations within the medical profession and the vast realm we now think of as "health care," Tomes considers what it means to be a "good" patient. As she shows, this history of the coevolution of medicine and consumer culture tells us much about our current predicament over health care in the United States. Understanding where the shopping model came from, why it was so long resisted in medicine, and why it finally triumphed in the late twentieth century helps explain why, despite striking changes that seem to empower patients, so many Americans remain unhappy and confused about their status as patients today.

Over the past two hundred years, Western North Carolina has evolved from a mountainous frontier known for illicit moonshine production into a renowned destination for craft beer. Follow its story from the wild days of saloons and the first breweries of the 1870s through one of the longest Prohibitions in the nation. Eventually, a few bold entrepreneurs started the first modern breweries in Asheville, and formerly dry towns and counties throughout the region started to embrace the industry. The business of beer attracts jobs, tourists and dollars, as well as mixed emotions, legal conundrums and entrepreneurial challenges. Join award-winning beer writer Anne Fitten Glenn as she narrates the storied history of brewing in Western North Carolina.

Ernest Hemingway, F. Scott Fitzgerald, and William Faulkner stand as the American voice of the Great War. But was it warfare that drove them to write? Not according to Keith Gandal, who argues that the authors' famous postwar novels were motivated not by their experiences of the horrors of war but rather by their failure to have those experiences. These 'quintessential' male American novelists of the 1920s were all, for different reasons, deemed unsuitable as candidates for full military service or command. As a result, Gandal contends, they felt themselves emasculated--not, as the usual story goes, due to their encounters with trench warfare, but because they got nowhere near the real action. Bringing to light previously unexamined Army records, including new information about the intelligence tests, *The Gun and the Pen* demonstrates that the authors' frustrated military ambitions took place in the forgotten context of the unprecedented U.S. mobilization for the Great War, a radical effort to transform the Army into a meritocratic institution, indifferent to ethnic and class difference (though not to racial difference). For these Lost Generation writers, the humiliating failure vis-a-vis the Army meant an embarrassment before women and an inability to compete successfully in a rising social order, against a new set of people. *The Gun and the Pen* restores these seminal novels to their proper historical context and offers a major revision of our understanding of America's postwar literature.
