Aviation Support Equipment Technician H 3 & 2 Network4Learning, inc.

The promise and peril of having children in an age of genetic tests and interventions. This is a summary of "The Gene Machine: How Genetic Technologies Are Changing the Way We Have Kids — and the Kids We Have," by Bonnie Rochman. This book covers a variety of topics from breast cancer to Tay-Sachs, several pre-natal genetic mapping technologies, genome sequencing, rare disease diagnosis, silencing of a gene, and repairing gene defects using gene editing tools (CRISPR). It covers the question of testing

for Down syndrome and abortion, and the emotionally and morally fraught decisions individuals are forced to make when confronting the information these tests reveal. Over the past few years, genetic testing has expanded into a full array of testing available prenatally, postnatally, and even pre-conception. A more targeted analysis has allowed women to weed out unhealthy embryos before attempting pregnancy. Genome sequencing gives the child's blueprint, including a predisposition to diseases such as Down syndrome, early-onset Alzheimer's, or breast cancer. Having access to so much information can be empowering, enlightening, confusing, and frightening. It can enable parents to prepare for a child with special needs. Or it could allow them to end the pregnancy. This is a must read for those planning on having kids, or for those who simply want to learn about genetic technologies. This guide includes: * Book Summary—helps you understand the key concepts. * Online Videos—cover the concepts in more depth. Value-added from this guide: * Save time * Understand key concepts * Expand your knowledge

Maintenance Mechanic (Automated Mail Processing Equipment)(USPS) Cengage Learning

This guide serves as a workbook to be used in conjunction with an approved course offered by a training partner recognized by the International Council for Machinery Lubrication (ICML) for a Machinery Lubrication Technician (MLT I or II) certification exam preparation course. The essence of this work is a guided, cooperative, and sometimes even argumentative dialogue between the authors, with continuous asking and answering of questions. This stimulates critical thinking, which in turn draws out underlying presumptions, and results in readers thinking like the person who actually built the exam. The authors are strong proponents of a unique 5-step process for learning: 1. Familiarize 2. Find Socrates 3. Be the Exam 4. Practice Exam 5. Explore This unconventional method has proven to be exceptionally effective, not for only passing the exam, but to truly retaining the knowledge and becoming an expert in the content you're

studying. Certification requirements are discussed throughout the work, making this the ideal resource for prospective MLT I and/or MLT II certification candidates. Unique Structured learning Notes Outline: For the reader to complete. Aids in organizing ideas and thoughts. Guided Cooperative Argument: A dialogue between authors concerning the topics. Helps answer questions that are asked on the job. Statements of Truth and Exam Development: From the recommended Body of Knowledge, with space to develop your multiple-choice questions. Develops critical thinking process and understanding of how the exam questions are structured. Body of Knowledge Outline: Works as a reference to help answer any questions that may arise. Practice Exam: A mock exam designed to familiarize the reader with taking a multiple-choice test that is similar in structure and content to the real one. Glossary & Appendices: List of common terms, charts, and tables with which all certification candidates need to be familiar.
