 Performance  
 ...Sport  
 Performance  
 Analysis gives  
 athletes and  
 coaches  
 objective  
 information  
 which helps  
 them to

understand and enhance both team and player performances. Analysis is usually completed by an analyst or coach who observe and “tag” events and actions during competition games and training sessions. Tagged events and actions can focus on the overall game which helps to understand the team performances, or can focus on individual players. iSport sAnalysis | What is Sport

Performance Analysis? Performance analysis is the process of assessing performance in a sport to develop an understanding of actions that can inform decision-making, optimize performance and support coaches and players in their journey towards optimal results. The role of a Performance Analyst in Sports | Sport ...Sport Performance Analysis discusses the techniques,

practices, software and professional development areas in the field of analytics applied to sports. Find performance analysis articles, technology information, courses, books and job opportunities in this rapidly growing discipline. Sport Performance Analysis Sports performance analysis, or sports coding, is a technique used by coaches to record events that happen during a match. Once

the events in a match have been recorded, the data can be used to generate reports which help to show team strengths, team weaknesses and therefore help coaches to improve performances. Sports Performance Analysis & Sports Coding | iSportsAnalysis Performance Analysis is a specialised discipline that provides athletes and coaches with objective information

that helps them understand performance. This process is underpinned by systematic observation, which provides valid, reliable and detailed information relating to performance. Performance Analysis can help enhance the coaching process by providing visual feedback (Video Analysis) and objective statistical analysis (Data analysis) E.g. Performance Analysis | Sport NISport

Performance Analysis gives coaches objective information which is used to optimise team and player performances. It involves analysts using software, like iSportsAnalysis, to tag, or code, events during matches with a view to helping coaches understand the effectiveness of game-plans and strategies and to understand team and player's strengths and weaknesses.
