Financial risk accompanies virtually every investment made by a multinational corporation. Given today's volatile world markets, astute financial risk management can be the key to comparative

financial advantage for any company, if not a critical safety valve.

Mpumalanga is known for its spectacular landscapes and its teeming game reserves. It also has an extraordinarily rich and vivid history which has not been previously recognized. The South African province's valued heritage and its contribution to tourism, education, and economic development remain undeveloped. This ground-breaking study ensures that this province's compelling past lives on in the present. Written by some of South Africa's foremost researchers, and richly illustrated with historical and contemporary photographs, the book tells a story that begins with the geological records of the first emergence of life on earth three to five billion years ago and concludes with the dawn of an inclusive democracy in South Africa. Areas covered include geology, archaeology, rock art, traditions of early settlements, frontier conflicts, the South African War, conservation, economic development, the contemporary political struggles in the 20th century, and the significance of all of this in the light of contemporary debates over heritage.

FCS Introduction to Systems Development L2 University of Kwazulu Natal Press

In *An Acid River Runs Through It*, photographer Eva-Lotta Jansson documents how water pollution by mining activities - acid mine drainage - affects water sources and communities in South Africa. Large volumes of acidic water carrying toxic sulphates and metals such as lead, zinc, copper and radioactive uranium are released into the environment by both past and current mining activities. The poisonous water flows from gold and coal mining sites, largely untreated, into the groundwater and into streams and rivers. These pollutants affect water resources already under strain from water shortages due to global warming and pollution by untreated sewage and other waste water. Acid mine water pollution most directly impacts already disadvantaged people in society, but ultimately threatens everyone's water resources and well-being. Although toxic, the pollution creates landscapes that are sometimes both colorful and eerily beautiful. Such photographs include a yellow lakebed filled with uranium dust and a white field looking like it's covered in snow. The photographer focuses on landscapes like these on the ground as well as from the air. In intimate portraits, we also meet communities and individuals who come in direct contact with the pollution. They include the farmers who lost both livestock and loved ones, after they drank poisoned water. We also see children play in a pool of rusty-colored acid mine drainage flowing outside their school gates. The book includes interviews with both experts and those affected. That makes this a factual photo book, which thoroughly explains what acid mine drainage is. Although the problem plagues many nations, the book analyses - within a historical context - why it's particularly bad in South Africa. The resulting document portrays an unmitigated environmental disaster and a violation of human rights. This 82-page soft-cover photo book includes 64 photographs and about 8,000 words. Copyright © Eva-Lotta Jansson 2015.

School Governing Bodies NYU Press

The World Report on Disability suggests more than a billion people totally experience disability. They generally have poorer health, lower education and fewer economic opportunities and higher rates of poverty than people without disabilities. This report provides the best available evidence about what works to overcome barriers to better care and services.

This publication is based on a project that sought to document current projects implementing restorative justice in South Africa. But what concrete progress has been made? Who is delivering direct restorative justice services to victims and offenders? What are the scope and quality of these services?

Many bacteria, viruses, protozoa, and fungi play key roles in the development of gastrointestinal diseases, and this practical reference brings you up to speed with this increasingly important area. Covering a broad range of GI diseases and cancers, this resource provides an expert overview of the field, ideal for all gastroenterologists and infectious disease physicians. Covers infections associated with gastroesophageal reflux disease and Barrett's esophagus, gallbladder disease, acute pancreatitis, small intestinal bacterial overgrowth, irritable bowel syndrome, inflammatory bowel disease, appendicitis, Whipple Disease, Crohn's Disease, and more. Discusses esophageal cancer, gastric cancer, cholangiocarcinoma, hepatocellular carcinoma, and colorectal cancer. Includes chapters on gut microbiome, fecal transplants, and the molecular pathogenesis of gastrointestinal infections. Consolidates today's available information on this timely topic into a single convenient resource.

Shaping the Future of South Africa's Youth Human Sciences Research Council

Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, *Insurgent Citizenship* argues that contradictory

realizations of citizenship characterize all democracies--emerging and established. Focusing on processes of city- and citizen-making now prevalent globally, it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories.

This food-lover's delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

Basic Education Rights Handbook Institute for Security Studies

Offers a detailed account of all the most important aspects of the judiciary in South Africa, both now and in the past. Provides a general survey of the judiciary as an institution.

Physical Science New Africa Books

A text no undergraduate should be without, this practical self-help guide shows how to get a career going on the right track, stressing the need for systematic planning and presenting students with an effective model for planning and decision making. Built around a framework of valuable exercises and models, it offers thorough "sum-it-all-up" worksheets which pull together personal, family/social, and career traits, preferences and conditions, and even moves beyond the job search to discuss ethics and effectiveness in the workplace.

Overview and Directory African Minds

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out,

what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

The Judiciary in South Africa Pearson South Africa

The Stone Age is now beginning to be recognised as vital in establishing who we are and where we have come from. This period has long been neglected.

Insurgent Citizenship Elsevier Health Sciences

The African National Congress is light years beyond the liberation movement of old. It remains a juggernaut, but its control and dominance are no longer watertight. The ANC lives the contradictions of weaknesses, cracks and factions while retaining its colossal status. As a party-movement it draws on its liberation credentials, and extracts immense power from its deep anchorage in South Africa's people. It is immersed in electoral politics that marks the state of its overwhelming power cyclically. As government the ANC is the object of protest, but not protest designed to bring the ruling party to its knees. The ANC is in command of the state, yet fails to definitively counter the deficits that make South Africa's democracy seem so diluted. Its incredulous and thus far trusting supporters condemn but only rarely punish deployees who do not 'pass through the eye of the needle'. The ANC and the Regeneration of Political Power unpacks these contradictions. It focuses on four faces of the ANC's political power - the organisation, the people, political parties and elections, and policy and government - and explores how the ANC has acted since 1994 to continuously regenerate its power. By 2011-12 the power configurations around the ANC were converging to a conjuncture holding vexing uncertainties. This book presents insights into how South African politics - in many ways synonymous with the politics of the ANC - is likely to unfold in years and possibly decades to come.
