Lexical Ontological Semantics introduces ontological methods into lexical semantic studies with the aim of giving impetus to various fields of endeavours which envision and model the semantic network of a language. Lexical ontological semantics (LOS) provides a cognition-based computation-oriented framework in which nouns and predicates are described in terms of their semantic knowledge and models the mechanism in which the noun system is coupled with the predicate system. It expands the scope of lexical semantics, updates methodologies to semantic representation, guides the construction of semantic resources for natural language processing, and develops new theories for human-machine interactions and communications.

Before 1970, scientific research in swimming was poor and anecdotal, and the improvements of performance were linked firstly to the swimmer's experience and, secondly, as a result of permanent research for speed. Before and after the Second World War, scientific studies were conducted by pioneers and marked the beginning of research in stroke mechanics and swimming physiology exercise. This book reviews research on the body of knowledge available for the improvement of sports coaching and training practice in swimming, which seems to be relevant, numerous, and diversified enough to help swimming coaches bridge the gap between theory and practice.

The acclaimed series The Collected Writings of Jean-Jacques Rousseau concludes with a volume centering on Emile (1762), which Rousseau called his "greatest and best book." Here Rousseau enters into critical engagement with thinkers such as Locke and Plato, giving his most comprehensive account of the relation between happiness and citizenship, teachers and students, and men and women. In this volume Christopher Kelly presents Allan Bloom's translation, newly edited and cross-referenced to match the series. The volume also contains the first-ever translation of the first draft of Emile, the "Favre Manuscript," and a new translation of Emile and Sophie, or the

This timely study offers a radical re-reading of Conrad's work in the light of contemporary theories of masculinity. Drawing on gay studies, feminism, film theory and literary theory, Roberts shows how Conrad's fiction, even as it reflects certain assumptions of its day about the role of men in society, offers striking insights into the instability of the 'masculine'. The book explores the relationship of masculinity with colonialism, modernity, the visual and the body in a wide range of Conrad's major and lesser-known fiction.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In A House To Remember, she explains why.

Most na Soči je ključno in najbolje raziskano arheološko najdišče v Zgornjem Posočju. Njegovo bogato preteklost že več kot poldrugo stoletje razkrivajo naključna odkritja in strokovna izkopavanja

tako naselbinskih ostankov iz bronaste, železne in rimske dobe kot tudi pripadajočih grobišč. V tej knjigi so predstavljena novejša odkritja na levem bregu Idrijce, kjer je že od konca 19. stoletja znano obsežno grobišče iz železne dobe. Na njegovem severnem obrobju je bilo z izkopavanji Tolminskega muzeja v letih 2000–2016 na treh lokacijah – Pucarjev rob, Repelc in Lipičarjev vrt – odkritih skupaj 88 grobov. Največ jih je iz železne dobe, vmes je bilo tudi ducat grobov iz rimske dobe in en iz zgodnjega srednjega veka. V njihovi neposredni bližini so bili odkriti še sočasna žganinska jama in kamnit zidec, pod njimi pa naselbinski ostanki iz pozne bronaste dobe.

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.
