 A Survey of Distributed Capability File Systems and Their ...
 Early distributed file systems merely execute file system calls on a remote server, which limits scalability and resilience to failures. Such limitations have been greatly reduced by modern techniques such as distributed hash tables, content-addressable storage, distributed consensus algorithms, or erasure codes.
 A Survey on Distributed File System Technology - IOPscience
 This paper is a survey of the current state of the art in the design of distributed file systems, the most widely used class of mechanisms for sharing data.
