It is a strange fact that many modern cell biochemists have a keen interest in biosynthetic processes, such as protein and nucleic biosynthesis or organelle biogenesis, but tend to regard degradative processes merely as irritating reactions that disrupt the flow of synthetic reactions. Historically, the elucidation of catabolic pathways preceded that of anabolic pathways, so that there is also a tendency to regard work on proteases, phospholipases, nucleases, etc., as somewhat "old-fashioned." It is the great contribution of Professor Luzikov's book to show that, at least in the case of mitochondrial research, the separation of studies on anabolic and catabolic processes has been very harmful. In an extremely erudite and measured way, the author carefully develops the argument that we can only understand mitochondrial biogenesis fully if we take into account the role of degradative processes. The action of lytic enzymes is shown not to be a random affair, but rather a process that is fully integrated

into the process of mitochondrial assembly. A second important contribution of this book is the fact that it contains a masterly review of the fundamental literature on mitochondrial structure, function, breakdown and synthesis presented in an integrated and logical manner.

In this groundbreaking book, Sheridan Blau introduces the literature workshop as the most effective approach to solving many of the classic instructional problems that perplex beginning and veteran teachers of literature. Through lively re-creations of actual workshops that he regularly conducts for students and teachers, Blau invites his readers to become active participants in workshops on such topics as: helping students read more difficult texts than they think they can read where interpretations come from the problem of background knowledge in teaching classic texts how to deal with competing and contradictory interpretations what's worth saying about a literary text balancing respect for readers with respect for texts and intellectual authority ensuring that literary discussions are lively and productive how to develop valuable and engaging writing assignments. Each workshop includes reflections on what transpired and a discussion of the workshop's rationale and outcomes in the larger context of an original and practice-based theory of literary competence and instruction.

*Hunger for Memory* is the story of Mexican-American Richard Rodriguez, who begins his schooling in Sacramento, California, knowing just 50 words of English, and concludes his university studies in the stately quiet of the reading room of the British Museum. Here is the poignant journey of a "minority student" who pays the cost of his social assimilation and academic success with a painful alienation — from his past, his parents, his culture — and so describes the high price of "making it" in middle-class America. Provocative in its positions on affirmative action and bilingual education, *Hunger for Memory* is a powerful political statement, a profound study of the importance of language ... and the moving, intimate portrait of a boy struggling to become a man.

In this remarkable sequel to his *Films of the Seventies: A Social History*, William J. Palmer examines more than three hundred films as texts that represent, revise, parody, comment upon, and generate discussion about major events, issues, and social trends of the eighties. Palmer defines the dialectic between film art and social history, taking as his theoretical model the "holograph of history" that originated from the New Historicist theories of Hayden White and Dominick LaCapra. Combining the interests and methodologies of social history and film criticism, Palmer contends that film is a socially conscious interpreter and commentator upon the issues of contemporary social history. In the eighties, such issues included the war in Vietnam, the preservation of the American farm, terrorism, nuclear holocaust, changes in Soviet-American relations, neoconservative feminism, and yuppies. Among the films Palmer examines are *Platoon*, *The Killing Fields*, *The River*, *Out of Africa*, *Little Drummer Girl*, *Kiss of the Spiderwoman*, *Silkwood*, *The Day After*, *Red Dawn*, *Moscow on the Hudson*, *Troop Beverly Hills*, and *Fatal Attraction*. Utilizing the principles of New Historicism, Palmer demonstrates that film can analyze and critique history as well as present it.

APA/MLA Guidelines provide writers with the information that they need to present their research findings correctly in APA/MLA formatted papers. Because both styles require in-text citations, confusion may set in when writing a paper in MLA. The use of the Guideline will allow you to decide quickly between APA: (Johnson, 2010) or MLA: (Johnson 25). Such information at your fingertips will end the waste of time searching for information and allow you to present a strong credible paper.

The second edition of *Writing in Psychology* by Scott A. Miller is a comprehensive guide to addressing the most challenging issues that students face while writing about psychology, including what to say and how to say it. It offers practical tools to overcome the challenges and create an engaging work. The book is a valuable resource for helping readers become better writers of psychology with the aid of various helpful learning tools, which provide detailed coverage of how to write empirical reviews, research proposals, literature reviews, term papers, and posters. It examines examples from journal articles that give readers a grasp of the content they will encounter in writing psychological reports. Furthermore, it includes exercises that provide an opportunity to apply the points conveyed in each chapter, examples of ways to avoid the most common mistakes made by students, and a guide to the best practices for improving one's writing. Readers will also develop a thorough understanding of how to write in an engaging yet accurate style, using grammatical and word use rules that govern writing in general, and the rules of seventh edition APA (American Psychological Association) Publication Manual that determine the expression of that content. Throughout, the book emphasizes inclusion, diversity, and fair treatment of those with whom psychologists deal, in research and writing. The book will benefit anyone looking for guidance on how to write about psychological content.
