## MELENDEZ KRISTOPHER

*Science and Technology Annual Reference Review, 1989* Voyage Press

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot

early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

With the emphasis firmly on Richard's monarchy rather than on his personal life, Gillingham's history aims to explain why the Lionheart's reputation has fluctuated more than that of any other monarch. The study places Richard in Europe, the Mediterranean and Palestine and demonstrates that few rulers had more enemies or more influence.
