A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the

devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities

of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

The Art and Science of Remembering Everything Simon and Schuster

This unique and brilliant book is a history of human knowledge. Before the invention of printing, a trained memory was of vital importance.

Based on a technique of impressing 'places'

and 'images' on the mind, the ancient Greeks created an elaborate memory system which in turn was inherited by the Romans and passed into the European tradition, to be revived, in occult form, during the Renaissance. Frances Yates sheds light on Dante's Divine Comedy, the form of the Shakespearian theatre and the history of ancient architecture; The Art of Memory is an invaluable contribution to aesthetics and psychology, and to the history of philosophy, of science and of literature.

you'll unlock the
potential of your
memory and brain.
You'll be able to
memorize almost
anything you like, and
at any time you like.
Before I began
studying memory
techniques, my
memory was very poor.
I could not remember
where I put my keys,
glasses or where I
parked my car. I
couldn't even
remember if I locked
my car doors or not. I
never used to be able
to remember
birthdays, passwords,
pin numbers, to do
lists, and everything
else in between. Not
being able to
remember the names
of the people I met was

my worst of all. Fast forward to present day and what seemed absolutely impossible to me a few years ago is now second nature to me. What you will achieve with your memory may seem impossible to you now, but when you start practicing the systems and methods in this beautiful art of memorising, you will be astonished to see that it was always possible and that you always had a good memory. If I could do this, I'm more than sure you can!
