This beautifully illustrated children's book tells the story of the Apollo Missions, when incredible intelligence, engineering, and bravery allowed humans to stand on the surface of something other than Earth for the very first time. "When I first looked back at the Earth, standing on the surface of the Moon, I cried." From the 1969 first moon landing to the amazing rescue of Apollo 13, each

chapter tells the story of a different mission. Humorous details bring the astronauts to life: discover how the astronauts of Apollo 12 were so over-excited when they stepped onto the Moon that Mission Control had to tell them to quiet down, and Shepard (Apollo 14) somehow managed to smuggle a golf club onto his spacecraft! Published to celebrate the 50th anniversary of the first moon landing, this is the perfect book for any child who has ever looked up at the moon and wondered what it might be like to go there.

Evolution's Rainbow

Llewellyn Worldwide

In this innovative celebration of diversity and affirmation of individuality in animals and humans, Joan

Roughgarden challenges accepted wisdom about gender identity and sexual orientation. A distinguished evolutionary biologist, Roughgarden takes on the medical establishment, the Bible, social science—and even Darwin himself. She leads the reader through a fascinating discussion of diversity in gender and sexuality among fish, reptiles, amphibians, birds, and mammals, including primates. *Evolution's Rainbow* explains how this diversity develops from the action of genes and hormones and how people come to differ from each other in all aspects of body and behavior. Roughgarden reconstructs primary science in light of

feminist, gay, and transgender criticism and redefines our understanding of sex, gender, and sexuality. Witty, playful, and daring, this book will revolutionize our understanding of sexuality.

Roughgarden argues that principal elements of Darwinian sexual selection theory are false and suggests a new theory that emphasizes social inclusion and control of access to resources and mating opportunity. She disputes a range of scientific and medical concepts, including Wilson's genetic determinism of behavior, evolutionary psychology, the existence of a gay gene, the role of parenting in determining gender

identity, and Dawkins's "selfish gene" as the driver of natural selection. She dares social science to respect the agency and rationality of diverse people; shows that many cultures across the world and throughout history accommodate people we label today as lesbian, gay, and transgendered; and calls on the Christian religion to acknowledge the Bible's many passages endorsing diversity in gender and sexuality. *Evolution's Rainbow* concludes with bold recommendations for improving education in biology, psychology, and medicine; for democratizing genetic engineering and medical practice; and for building a public monument to affirm

diversity as one of our nation's defining principles.

Of Cats and Men John Wiley & Sons The #1 New York Times bestselling

author of the Vampire Academy and Bloodline series returns with the second installment in her acclaimed Age of X series. Religious investigator Justin March and Mae Koskinen—the beautiful supersoldier assigned to protect him—have been charged with investigating reports of the supernatural and the return of the gods, both inside the Republic of United North America and out. With this highly classified knowledge comes a shocking revelation: Not only are the gods vying for human control, but the elect—special humans marked by the divine—are turning against one another in bloody fashion. Their mission takes a new twist when they are

assigned to a diplomatic delegation headed by Lucian Darling, Justin’s old friend and rival, going into Arcadia, the RUNA’s dangerous neighboring country. Here, in a society where women are commodities and religion is intertwined with government, Justin discovers powerful forces at work, even as he struggles to come to terms with his own reluctantly acquired deity. Meanwhile, Mae—grudgingly posing as Justin’s concubine—has a secret mission of her own: finding the illegitimate niece her family smuggled away years ago. But with Justin and Mae resisting the resurgence of the gods in Arcadia, a reporter’s

connection with someone close to Justin back home threatens to expose their mission—and with it the divine forces the government is determined to keep secret.

work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of thought, Becker tackles the problem of the vital lie - man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal - to become part of something we believe will last forever. In this way we hope to give our lives meaning. In

The Denial of Death, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

The World in Six Songs

Walter Foster Jr

The author of the New York Times bestseller This Is Your Brain on Music reveals music's role in the evolution of human culture in this thought-provoking book that "will leave you awestruck" (The New York Times).

Daniel J. Levitin's astounding debut bestseller, This Is Your Brain on Music, enthralled and delighted readers as it transformed our understanding of how music gets in our heads and stays there. Now in his second New York Times bestseller,

his genius for combining science and art reveals how music shaped humanity across cultures and throughout history. Here he identifies six fundamental song functions or types—friendship, joy, comfort, religion, knowledge, and love—then shows how each in its own way has enabled the social bonding necessary for human culture and society to evolve. He shows, in effect, how these "six songs" work in our brains to preserve the emotional history of our lives and species. Dr. Levitin combines cutting-edge scientific research from his music cognition lab at McGill University and work in an array of related fields; his own sometimes hilarious experiences in the

music business; and illuminating interviews with musicians such as Sting and David Byrne, as well as conductors, anthropologists, and evolutionary biologists. *The World in Six Songs* is, ultimately, a revolution in our understanding of how human nature evolved—right up to the iPod.

"Every human being is by right a warrior who has achieved his place in the world in a battle of life and death. Look at it this way, at least once, as sperm, we all fight the bullfight for life - a unique contest against millions of other competitors - and we win! Now the battle continues... "A warrior knows that there is no guarantee of triumph over death. Even so, he fights his battle, not because he believes he will win, but because of the emotion of the war itself. For him, to give his war is already a victory. And while he fights he rejoices,

because, for those who have already died, every second of life is a gift." "I love my children because they are deposits of my energy, my wife because she washes my clothes, she cooks and I catch her, my dog because he takes care of the house, my country because I was born here, my god because he's going to save me...". "The sorcerers have discovered the most refined form of love, because they love themselves. They have put the power of passion at the service of being, and it gives them the impetus to undertake the only quest that counts: that of oneself.
