This book presents selected papers on the factors that serve to influence an individual's capacity in financial decision-making. Initial chapters provide an overview of the cognitive factors affecting financial decisions and suggest a link between limited cognitive capacity and the need for financial education. The book then expands on these

cognitive limitations to explore the tendency for overconfidence in decision-making and the interplay between rational and irrational factors. Later contributions show how credit card companies benefit from limitations in consumer financial literacy, how gender and cognition intersect to play an important role in financial decision-making, and how to improve financial

capacity through financial literacy and education campaigns, including those addressing developed marketplaces. This comprehensive collection of papers will be of value to all readers who seek to better understand the multi-factorial and complex nature of personal financial management in today's economic climate.

<p>Creating Solidarity Across Diverse Communities International Perspectives in Education Teachers College Press <i>Madhya Pradesh Gazette</i> United Nations For the first time since Swami Vivekananda's famous address to the World's Parliament of Religions in Chicago on 11 September 1893, this provocative study seeks to rescue the historical Vivekananda from the</p>	<p>celebrated Swamiji of the legend and hagiography. Using a variety of primary and contemporary secondary sources, including eyewitness accounts in English as well as Bengali, Professor Narasingha P. Sil examines Vivekananda's early life and education, his meeting and relationship with his future mentor Sri Ramakrishna Paramahansa , and the circumstances leading to his embracing monastic life.</p>	<p>Analyzing Vivekananda's numerous sermons, speeches, conversations, and letters, Sil exposes the Swami's deliberate distortion of facts and purposive misinformatio n on, and misleading and tendentious interpretation of, aspects of Hindu society and culture. who championed the causes of the poor and the downtrodden and thus exemplified the doctrines of socialism at their finest. Sil is the first scholar to critically examine Vivekananda's attitude toward women in general and to probe into his experience with Margaret Noble (Sister Nivedita) in particular, and he is the first author to provide a detailed analysis of Vivekananda's

popularity as a preacher and lecturer. The Calcutta Gazette Walter de Gruyter GmbH & Co KG Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data

mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For

the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are

largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers

and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online. The first book to chart the country's growth using the boundary as a political and cultural focus, Bill Hubbard's masterly narrative begins by explaining how the original thirteen colonies organized their borders and decided that unsettled lands should be held in trust for the common benefit of the people. Hubbard goes on to

show—with the help of photographs, diagrams, and hundreds of maps—how the notion evolved that unsettled land should be divided into rectangles and sold to individual farmers, and how this rectangular survey spread outward from its origins in Ohio, with surveyors drawing straight lines across the face of the continent. Mapping how each state came to have its current shape, and

how the nation itself formed within its present borders, American Boundaries will provide historians, geographers, and general readers alike with the fascinating story behind those fifty distinctive jigsaw-puzzle pieces that together form the United States. Coronavirus Disease (COVID-19): Psychological and Behavioral Consequences of Confinement on Physical

Activity, Sedentarism, and Rehabilitation Susquehanna University Press This volume examines the assessment of higher order thinking skills from the perspectives of applied cognitive psychology and measurement theory. The volume considers a variety of higher order thinking skills, including problem solving, critical thinking, argumentation , decision

making, creativity, metacognition, and self-regulation. Fourteen chapters by experts in learning and measurement comprise four sections which address conceptual approaches to understanding higher order thinking skills, cognitively oriented assessment models, thinking in the content domains, and practical assessment issues. The volume discusses models of thinking skills,

as well as applied issues related to the construction, validation, administration and scoring of performance based, selected-response, and constructed-response assessments. The goal of the volume is to promote a better theoretical understanding of higher order thinking in order to facilitate instruction and assessment of those skills among students in all K-12 content domains, as well as

professional licensure and certification settings. *Plates* Universitätsverlag Göttingen Awards and Praise for the first edition: Recipient of the 2006 International Association for Relationship Research (IARR) Book Award "This text, as it presently stands, is THE go-to text for stalking researchers. That is my opinion and the opinion of multiple fellow scholars I know in the field. It rarely sits on my

shelf, but rather is a constant reference on my desk. I can always count on these authors to have done an extensive review of literature. I thought I was thorough, but they are always providing me with new references." -- Dr. H. Colleen Sinclair, Associate Professor of Psychology, Mississippi State University "Cupach and Spitzberg provide the reader with a multidisciplina

ry framework for understanding the nature and impact of unwanted relationship pursuits. This book is an excellent resource for students and professionals alike who seek to gain knowledge about unwanted relational pursuits and stalking." —Journal of Couple & Relationship Therapy The Dark Side of Relationship Pursuit provides historical and definitional frames for

studying unwanted relationship pursuit, and considers the role of the media, law, and social science research in shaping today's conceptualizations of stalking. The volume integrates research from diverse contributing fields and disciplines, providing a thorough summary and assessment of current knowledge on stalking and obsessive pursuit. Building on

<p>the foundation of the award-winning first edition, this revision considers assessment issues, offers an expanded analysis of the meta-analysis data set, and includes coverage of intercultural and international factors. As an increasing number of scholarly disciplines and professional fields study stalking and other forms of obsessive relationship pursuit, this book is a must-have resource for</p>	<p>examining interpersonal conflict, social and personal relationships, domestic violence, unrequited love, divorce and relational dissolution, and harassment. It also has much to offer researchers, counselors, and professionals in psychology, counseling, criminal justice, sociology, psychiatry, forensic evaluation, threat assessment, and law enforcement. <u>International</u></p>	<p><u>Perspectives in Education</u> IAP Includes entries for maps and atlases. Now available in paperback, the sixth edition of this definitive text provides students a strong background in the conceptual, theoretical, and philosophical issues in multicultural education from a leading authority and scholarly leader of the field---James A. Banks. In the opening chapter author Banks presents his well-known and widely used concept of Dimensions of

Multicultural Education to help build an understanding of how the various components of multicultural education are interrelated. He then provides an overview on preparing students to function as effective citizens in a global world; discusses the dimensions, history, and goals of multicultural education; presents the conceptual, philosophical, and research issues related to education

and diversity; examines the issues involved in curriculum and teaching; looks at gender equity, disability, giftedness, and language diversity; and focuses on intergroup relations and principles for teaching and learning. This new edition incorporates new concepts, theories, research, and developments in the field of multicultural education and features: A new Chapter 5, "Increasing Student Academic

<p>Achievement: Paradigms and Explanations" provides important explanations for the achievement gap and suggests ways that educators can work to close it. A new Chapter 7, "Researching Race, Culture, and Difference," explains the unique characteristics of multicultural research and how it differs from mainstream research in education and social science. A new Chapter</p>	<p>14, "Principles for Teaching and Learning in a Multicultural Society" contains research-based guidelines for reforming teaching and the school in order to increase the academic achievement and social development of students from diverse racial, ethnic, cultural, language, and gender groups. A new Appendix—"Essential Principles Checklist"—designed to help educators</p>	<p>determine the extent to which practices within their schools, colleges, and universities are consistent with the research-based findings described in the book. <i>Combined Membership List</i> Routledge The status and position of Indian women have undergone many changes since the high status they enjoyed in the Vedic era yielded to forced suicide during the dark ages, female</p>

In this important book, experts from around the globe come together to examine what solidarity in multicultural societies might mean and how it might be built. With a variety of analytical perspectives and findings, the authors present original research conducted in the United States, New Zealand, Spain, France, Chile, Mexico, and India. Educators will

recognize relationships between issues discussed in the book and their own places of work, helping them to better understand issues of diversity and take steps toward building solidarity in their own schools and communities. This book demonstrates the commonality of purpose across the globe to connect schools and teachers with the communities

they serve, and suggests avenues for bringing diverse understanding s together to bridge antagonism and fear.

Adat and Indigeneity in Indonesia
 University of Chicago Press
 A number of UN conventions and declarations (on the Rights of Indigenous Peoples, the Protection and

Promotion of the Diversity of Cultural Expressions and the World Heritage Conventions) can be understood as instruments of international governance to promote democracy and social justice worldwide. In Indonesia (as in many other countries), these international agreements have encouraged the self-assertion of communities that had been oppressed and deprived of their land,

especially during the New Order regime (1966-1998). More than 2,000 communities in Indonesia who define themselves as *masyarakat adat* or “indigenous peoples” had already joined the Indigenous Peoples’ Alliance of the Archipelago” (AMAN) by 2013. In their efforts to gain recognition and selfdetermination, these communities are supported by international

<p>donors and international as well as national NGOs by means of development programmes. In the definition of masyarakat adat, “culture” or adat plays an important role in the communities’ self-definition. Based on particular characteristics of their adat, the asset of their culture, they try to distinguish themselves from others in order to substantiate their claims for the restitution of their</p>	<p>traditional rights and property (namely land and other natural resources) from the state. The authors of this volume investigate how differently structured communities - socially, politically and religiously - and associations reposition themselves vis-à-vis others, especially the state, not only by drawing on adat for achieving particular goals, but also</p>	<p>dignity and a better future. <i>Combined Membership List of the American Mathematical Society and the Mathematical Association of America</i> Motilal Banarsidass Publ. For over 2500 years, Buddhism was implicated in processes of cultural interaction that in turn shaped Buddhist doctrines, practices and institutions. While the cultural plurality of Buddhism has</p>
--	--	---

often been remarked upon, the transcultural processes that constitute this plurality, and their long-term effects, have scarcely been studied as a topic in their own right. The contributions to this volume present detailed case studies ranging across different time periods, regions and disciplines, and they address methodological challenges as well as theoretical problems. In addition to

casting a spotlight on topics as diverse as the role of trade contacts in the early spread of Buddhism, the hybrid nature of religious practices in Japan or Indo-Tibetan relations in Tibetan polemical literature, the individual papers jointly raise the question as to whether there might be something distinct about how Buddhism steers and influences forms of cultural exchange, and

is in turn shaped by modalities of cultural interaction throughout Asian, as well as global, history. The volume is intended to demonstrate the need for investigating transcultural dynamics more closely in the study of Buddhism, and to suggest new avenues for Buddhist Studies.

A Textbook of

Medieval Indian History studies aspects of the political history of medieval India and examines the socio-economic changes, administrative innovations, and cultural ferments during this period with special reference to literature, religion and art and architecture. This handsomely illustrated textbook covers Indian history from the eighth to eighteenth century and

analyses the development of Indian society and culture that led to the medieval mindset and in doing so locates the historiographical debates surrounding such an analysis. It provides a valuable introduction to topics such as the coming of the Turks, the establishment of the Delhi Sultanate, the rise of the Vijayanagar and Bahamani kingdoms, the rule of the Mughals, the progress of

Maratha power and the advent of the Europeans. Written in a simple and lucid style, this textbook is designed specially for students of medieval India.

This book explores 'sex work' in Nepal as a social and analytical category. Narrating stories of those subsumed under such definition, it examines changes as well as

continuities characterising socio-cultural norms and perceptions through an analysis of sexual consumption. It also highlights the ways in which the development sector, media, and local community discourses frame 'sex work' as a distinct category. How does the work of development aid projects affect the understanding of the sex worker category? How are visual

and media images employed to mark spaces of perdition in the Nepalese urban setting and what forms of imagination do they trigger? How are intimate practices and relations transformed by imported notions of love, and how do standards of propriety related to such interactions shift? This book attempts to answer some of these questions. An in-depth and intimate ethnography,

the book deconstructs the sex worker category against the backdrop of global influences within local urban surroundings and points to the contradictions therein. Furthermore, through thorough descriptions of the experiences, agency, decision-making processes, and lives of those labelled as sex workers, the book challenges

concepts such as deviance and victimhood. It proposes a counternarrative by rethinking ideas of gender, objectification, marginality, symbolic violence, and discrimination. This book will greatly interest researchers and scholars in women and gender studies, sociology and social anthropology, South Asian studies and social sciences, as well as NGOs and those

involved in the development sector. *British Book News* This book elucidates the early Buddhist teachings and beliefs concerning meditations and its role in the process to liberation. In a number of cases, the Buddhist canonical texts reject practices which they accept elsewhere. When these practices-sometimes rejected, sometimes accepted-correspond to what is known

about non-Buddhist practices, the conclusion in then proposed that they are non-Buddhist practices which have somehow found their way into the Buddhist texts. A similar procedure enables one to choose between conflicting beliefs. *From Attraction to Obsession and Stalking* The 30th edition of the World Investment Report looks at the prospects for

foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of

international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production

underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable

Development progress and possible
Goals, to propose courses of
review global action.
