Objective: To enlarge a small picture to poster size using scale drawing techniques. Choose a small picture such as a candy wrapper, a cartoon character, an interesting label, etc. Draw a square grid over your picture. Be very precise and make sure that all lines are equally spaced using centimeters or inches. Geometry 1B SCALE DRAWING PROJECT Geometry SCALE DRAWING PROJECT. Objective: To enlarge a small picture to poster size using scale drawing techniques. Be very precise and make sure that all lines are equally spaced using centimeters or inches. Geometry Scale Drawing Project Cole is an urban planner. He wants to create a small scale drawing of a city block. The block is a square with an area of 8,100 square meters. Create a scale drawing of the block using a scale factor of 0.1. So the first thing we could think about, they give us the area of the block. And it's a square block. So it has the same length and width. Scale Drawings Resources | Tes This mini-project is designed to follow learning about scale drawings. The resource contains all the instructions. Students are required to design and draw, to a scale of their choice, a house containing at least 5 rooms and present the drawing with the real measurements of each room along and the scale used. Design your dream home - scale drawing project There are a lot of extended real world projects that would work with this topic. One of the them is to take a candy bar wrapper and to make a scale drawing that's 10 times larger than the original. Another very popular project related to scale drawings is to recreate a room or house in a scaled down drawing. 8 Scale Drawing Activities - Idea Galaxy In this project, you will get to work like engineers and create scale models of objects of your choosing. Look for an object with relatively simple geometry—or one with geometry that has the potential to be simplified easily. You will decide which dimensions are going to help you construct an accurate scale model. Math Relationships: Scale Model Building Project ... Scale Drawing/Model Project Rubric - Muse TECHNOLOGIES This means that for every 50 inches of actual length, you will draw 1 inch in your scale model. Since you are reducing from an actual size to a smaller scale model, you will have to divide the measurements by 50. This gives a length of 8 inches ($400 / 50$) and a width of 6 inches ($300 / 50$). So, your scale model will be 8 inches \times 6 inches.
