Help students become more geographically literate and better

prepared for the global community. Each book has 18 units that cover the 18 National Geography Standards. High-interest activities introduce students to places and regions, physical systems, human systems, environment and society, and the uses of geography.

The Reference Catalogue of Current Literature Carson-Dellosa Publishing

Winding through purple mountains majesties and amber waves of grain, the standards-based Spectrum Geography: Regions of the U.S.A. for grade 4 guides your child's understanding of maps, regions, canals, tributaries, and more using colorful illustrations and informational text. --Spectrum Geography is an engaging geography resource that goes beyond land formations and maps—it opens up children's perspectives through local,

national, and global adventures without leaving their seats.

Teacher Created Resources

This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.

In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for

collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

On the train, on the beach, on the sofa ... many people in all parts of the world enjoy doing wordsearches. If you are studying English and want to learn and practise vocabulary related to various topics, then this book is for you! The topics reflect the kinds of everyday conversations that you might have both with native and non-native speakers of English. The topics are also those that are typically tested in English examinations e.g. TOEFL, Cambridge (First Certificate, Advanced), IELTS, and Trinity. Each chapter begins with a list of questions to enable you to have a conversation about a particular topic in various situations: on a social occasion (e.g. a work dinner, a conference lunch, a party); in the classroom during an English lesson; when chatting, either face to face or online; and during an English oral exam. After the list of questions, you will find a Word List associated with the topic and exercises to test your knowledge of less common words. The final aim is then to find the words from the Word List in the related Wordsearch. Easy English! is a series of books to help you learn and revise your English with minimal effort. You can improve your English by: reading texts in English that you might normally read in your own language e.g. jokes, personality tests, lateral thinking games, and wordsearches; doing short exercises to improve specific areas grammar and vocabulary, i.e. the areas that tend to lead to the most mistakes - the aim is just to focus on what you really need rather than overwhelming yourself with a mass of rules, many of which may have no practical daily value. Other books in the Easy English! series include: Wordsearches: Widen Your Vocabulary in English Test

Your Personality: Have Fun and Learn Useful Phrases Word games, Riddles and Logic Tests: Tax Your Brain and Boost Your English Top 50 Grammar Mistakes: How to Avoid Them Top 50 Vocabulary Mistakes: How to Avoid Them

Geography Carson-Dellosa Publishing

An investigative approach to Cambridge IGCSE Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.
