This craft was first mastered by the Babylonians way back in 2800 B.C. Experts discovered this during an excavation process many

years ago. Although the ancient Babylonians may not have had the same tools at their disposal as us, their methods of soap making were not actually that different to the ones that we use today. What's In A Bar Of Soap? Soap can be found in every house in the country. We all use it, but very few of us actually take the time to think about the ingredients contained in a bar of soap. Worryingly, there are

many problems with the standard bars of soap that you can buy in any supermarket. Most of them contain ingredients that can actually be harmful to the skin. This is why we find that so many people are very interested in learning how to make their own soap. Vegan soap is slowly gaining popularity, and there are many reasons for this. First of all, there is the fact that there are absolutely no

additives to be found in homemade vegan soap that can be harmful to the skin. //// "Beautiful in its simplicity. . . . A definitive book for experienced

as well as beginning milk soapers." -- Rebekah Bailey, The Original Soap Dish, South Whitley, Indiana "An easy to read and understand book that will take the mystery out of milk-based soapmaking and debunk some of the myths surrounding it. It contains some great basic formulas to get you started making milk soaps of any kind, and fuel to let your imagination run wild when

you are ready to formulate your own creations. A good source of information for new soapmakers, and also suitable for more experienced soapmakers who want to start making milk soaps but thought it would be too difficult." -- Amanda Guilfoyle, Bodelicious Bath & Body Products, Ipswich, Queensland, Australia "As always, Anne is up to her usual excellence. This book

Anne once again acquits herself ably as a scholar of the suds and a natural communicator ." -- Wishing Willow (blog) "Enthusiastically recommended ." -- Midwest Book Review, Feb. 2009, "Reviewer's

Anne writes in a conversational style that made me feel as though I were sitting down with her in her kitchen. . . . Anne details what seems to be everything there is to know about the subject. Rather than simply offering her opinions and favorite practices,

Anne did extensive testing and experimenting , learning how to make the best milk soap bars that could be made. Soapmakers will be impressed with the amount and quality of Anne's research and observations. . . That leaves the question: Can a neophyte made good cold-process milk soap? I now say yes, with the caveat they have 'Milk Soapmaking' in hand." --
